2.0 EXECUTIVE SUMMARY

GSG Consultants, Inc. (GSG) completed a Preliminary Environmental Site Assessment (PESA) for the proposed 75th Street Improvement Project located in DuPage County, Illinois.

The scope of this project includes the following: “The project along 75th Street at the intersections of Millbrook Drive, Modaff Road, Olympus Drive, and Greene Street in Naperville involves evaluation of the intersections to identify improvements that will increase the safety of the intersection while minimizing impacts to the operational characteristics of the intersection. It is anticipated that improvements will include but not be limited to traffic signal modernization, incorporation of high visibility backplates, conversion of the left turn 75th Street approaches to protected only phasing and adding a dedicated right turn lane on each 75th Street approach to remove turning vehicles from the thru lane movement.”

This PESA includes four (4) intersections located across a 5-mile stretch of 75th Street. The PESA includes 37 sites along the project area.

This report identifies and evaluates Recognized Environmental Conditions (RECs). In accordance with the ASTM Standard E1527-13, RECs are defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”

The following tables present a list of sites that were evaluated as part of this report. **Table 1** presents a list of sites along the project for which RECs were identified. **Table 2** presents a list of sites along the project for which only *de minimis* conditions were identified. **Table 3** presents a list of sites along the project for which neither RECs nor *de minimis* were identified. **Table 4** presents a list of sites adjoining, but not on the project area, that were identified on environmental databases or historic map reviews. Sites identified with RECs may require additional investigations.

Table 1 – Sites Along the Project Area Containing RECs

Property Name	PESA Site	REC(s) including <i>de minimis</i> Condition(s)	Regulatory Database(s)	Land Use
Hobson Plaza	6	Historical dry cleaner, SRP site with Comprehensive NFR; <i>Transformers, ACM, LBP, Historical Agricultural Land</i>	RCRA-CESQG, FINDS, ECHO, EDR Historical Cleaners, SRP, Institutional Controls, Engineering Controls	Commercial

Table 1 – Sites Along the Project Area Containing RECs (continued)

Brighton Commons	A	Active dry cleaner, SRP with an NFR Letter with preventative, engineering, and institutional controls; <i>Transformers, Historical Agricultural Land</i>	EDR Historical Cleaners, FINDS, RCRA-SQG, SRP, Institutional Controls, Engineering Controls, BOL, ECHO	Commercial

Table 4 – Adjoining Sites Identified in Environmental Databases (continued)

Property Name	PESA Site	REC(s) including <i>de minimis</i> Condition(s)	Regulatory Database(s)	Land Use
Mobil Gas Station	B	Active gas station, Historical LUST incidents closed with an NFR Letter with a groundwater use restriction, active USTs with violations; <i>Historical Agricultural Land</i>	FINDS, RCRA-SQG, ECHO, UST, LUST	Commercial
Residential Property	C	<i>Historical Agricultural Land</i>	EDR Historical Auto	Residential

Where REC(s) are indicated as present, a condition was noted that may be indicative of releases or potential releases of hazardous substances on, at, in, or to the site, as discussed in the text. Potential hazards were not verified otherwise assessed as part of this PESA. Sites identified with RECs may require additional investigations to determine soil handling and management during construction.

Where RECs are not indicated as present, radon, biological hazards (such as mold, medical waste, or septic waste), and non-agricultural pesticides and/or herbicides may still be of concern. No further investigation concerning the presence or use of these factors was conducted for this PESA.

For the purposes of this report, the following are considered to be *de minimis* conditions:

- Normal use of lead-based paint (LBP) on exteriors and interiors of buildings and structures;
- Use of asbestos-containing materials (ACM) in building construction; and
- Transformers in normal use, unless the transformers were observed to be leaking, appear on an environmental regulatory list, or were otherwise determined to pose a hazard not related to normal uses; and
- Agricultural use of pesticides and herbicides. In addition, most land in Illinois was under agricultural use prior to its conversion to residential, industrial, or commercial development. Pesticides, both regulated and otherwise, may have been used throughout the project area at any time. Unless specifically discussed elsewhere in this report, no information regarding past pesticide use that would be subject to enforcement action was located for this project, and such use is considered a *de minimis* condition.

Radon and biological hazards are not considered in this PESA unless specifically noted. Although potential natural hazards, if present, are described in this report, they are not considered as RECs or *de minimis* conditions for the purposes of this report and are therefore not listed in the tables above.

3.0 INTRODUCTION

GSG Consultants, Inc. (GSG) completed a Preliminary Environmental Site Assessment (PESA) for the proposed 75th Street Improvement Project located in DuPage County, Illinois.

The project area is located in Naperville, Woodridge, and Unincorporated DuPage County, in the southern portion of DuPage County. This PESA includes four (4) intersections located across a 5-mile stretch of 75th Street. The PESA includes 37 sites along the project area.

This report identifies and evaluates RECs that may be indicative of releases or potential releases of hazardous substances on, at, in, or to the proposed project. The report has been prepared using reasonably ascertainable sources, including historical and geological information including aerial photographs, U.S. Geological Survey (USGS) topographic maps, file information of the Illinois State Geological Survey (ISGS) and other state agencies, Sanborn Fire Insurance Maps, and various other historical information sources. An on-site visual reconnaissance including the target and adjoining properties with photographic documentation was completed as part of this assessment. The specific methods used to conduct the assessment are contained in "A Manual for Conducting Preliminary Environmental Site Assessments for Illinois Department of Transportation Infrastructure Projects" (Erdmann et al., 2014).

3.1 Limitations/Exceptions

The PESA was performed in accordance with the IDOT-ISGS Manual (Erdmann et al., 2014) and not with the All Appropriate Inquiries environmental assessment standard (40 Code of Federal Regulations Part 312) that took effect on November 1, 2006 or the ASTM International Standard E1527-13 that took effect on November 1, 2013. The findings and conclusions contained herein have been promulgated in accordance with generally accepted environmental methods. These environmental methods have been developed to provide the Client with information regarding apparent indications of existing or potential recognized environmental conditions relating to the property and are limited to the conditions observed at the time of the site investigation.

While this report provides an overview of potential environmental concerns, both past and present, the PESA is limited by the availability of information at the time of the assessment. The scope will not provide sufficient information to eliminate the total risk of the on-site presence of recognized environmental conditions. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the project area may have occurred which could not be identified. Significantly higher levels of exploratory efforts than those performed are required to accumulate information to approach that type of total risk reduction.

The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by Bowman Consulting Group. Should additional information become available which differs significantly from our understanding of conditions

presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

The following exceptions applicable to the entire project were identified:

- There is no Sanborn Fire Insurance Map coverage for the entirety of the Project Area. However, GSG believes that there is sufficient information available so that this will not hinder this investigation.
- As specified in the agreed upon scope of work, title and environmental lien searches were not conducted as part of this PESA. This data gap is not expected to impact the results of this assessment.
- Aerial photographs provided information only for those specific years covered by the photographs as identified in the References and Sources Consulted sections of this report. No records were available for intervening years other than those identified herein. The Aerial Photographs are included in **Appendix B**.
- GSG did not have physical access to private properties within the project area. GSG made all visual observations from public vantage points.

4.0 GEOLOGY AND NATURAL FEATURES

4.1 Topography

The 2018 USGS 7.5-minute Normantown and Romeoville Quadrangles show the western portion of the project area to be sloping generally east towards the West Branch of the DuPage River, starting at an elevation of around 700 feet to around 650 feet. The eastern portion of the project area is generally sloping east towards the East Branch of the DuPage River, starting at an elevation of 690 feet to 670 feet.

4.2 Geology

4.2.1 *Bedrock Geology*

GSG reviewed several published documents in an effort to determine the regional geological setting in the area of the project area. The bedrock in the Chicago area is overlain by glacial drift that was deposited by Pleistocene glaciers that repeatedly covered the area and by the various high-level states of Lake Michigan. The Pleistocene strata which underlies the study area, as inferred from the “Surficial Geology of the Chicago Region” (Willman and Lineback, ISGS, 1970), consists of the Valparaiso Ground Moraine of the Yorkville Member of the Wedron Formation deposited during the Wisconsin Glacial Period. The Wedron Formation consists of “mostly gray to dark gray clayey till, locally silty clayey till; contains abundant small pebbles (especially in Marseilles Drift), local lenses of silt, and less commonly lenses of sand and gravel.” Areas of the project area also consist of the deposits of the Mackinaw Member of the Henry Formation and the Wasco Member of the Henry Formation deposited during the Wisconsin Period. Mackinaw Member of the Henry Formation deposits consist of “sand and gravel, generally well sorted and evenly bedded” and is formed by “deposits in valleys; mostly glacial outwash in terraces – remnants of valley trains; includes similar deposits in the glacial sluiceways.” Wasco Member of the Henry Formation deposits consist of “sand and gravel, unevenly sorted, irregularly bedded, with variable grain size; commonly contains lenses of silt and till; glacial ice-contact deposits in kames, eskers, and kame terraces.”

4.2.2 *Surficial Geology*

Overlying the Pleistocene deposits are several types of surficial soil deposits, according to the Web Soil Survey (US Dept. of Agriculture, 2019).

The first classification of soil deposits is the Elliott Silt Loam. These consist of a “Thin mantle of loess or other silty material and the underlying silty clay loam till; somewhat poorly drained.” The second classification of soil deposits is the Drummer Silty Clay Loam. These consist of “silty material and the underlying loamy outwash; poorly drained.” The third classification of soil deposits is the Varna Silt Loam. These consist of a “Thin mantle of silty material and the underlying silty clay loam till; moderately well drained.” The fourth classification of the soil deposits is the Ozaukee Silt Loam. These consist of a “Thin mantle of silty material and the

4.0 GEOLOGY AND NATURAL FEATURES

underlying silty clay loam till; moderately well drained.” The fifth classification of the soil deposits is the Orthents. These consist of “areas of disturbed soil material. They are fine, mixed, active, nonacid, mesic Aquic Udorthents; moderately well drained.”

According to the “Potential for Contamination of Shallow Aquifers from Land Burial of Municipal Wastes,” (Richard C. Berg, John P. Kempton, ISGS, 1984), the project area is located within the B2, C2, and E rating areas.

The geologic materials in the B2 rating area consist of “sand and gravel within 20 feet of the surface, overlain by relatively impermeable till or other fine-grained material.” The potential for contamination is “high” because “wastes in 20-foot trenches will be in contact with water bearing sand and gravel.” The geologic materials in the C2 rating area consist of “continuous sand and gravel unit (often thin) between 20 and 50 feet deep; always overlain by relatively impermeable till or other fine-grained material and underlain by till or dense bedrock.” The potential for contamination is “high, although the thick overlying deposits protect aquifers.” The geologic materials in the E rating area consist of “uniform, relatively impermeable silty or clayey till or other fine-grained materials more than 50 feet thick; no sand and gravel identified.” The potential for contamination is “low” because of low hydraulic conductivity, 1×10^{-9} to 1×10^{-7} cm/sec and good attenuation capacities.

Based on the “Potential for Contamination of Shallow Aquifers by Surface and Near-Surface Waste Disposal,” (Richard C. Berg, John P. Kempton, ISGS, 1984), the Site is located within the A2 and C2 rating areas. The geologic materials in the A2 rating area consist of “thick deposits of permeable sand and gravel at land surface; overlain by less than 5 feet of loess or silty lacustrine materials.” The potential for contamination is “high” because of high hydraulic conductivity, averaging 1×10^{-3} cm/sec” allowing for “rapid migration.” The geologic materials in the C2 rating area consist of “sand and gravel within 20 feet of the surface; overlain by till or other fine-grained materials; underlain by till or dense bedrock.” The potential for contamination is “moderate” because “sand and gravel generally occurs between 10 and 20 feet deep, so at least 10 feet of overlying till or other fine-grained material provides some natural protection.”

4.3 Hydrogeology

No site-specific hydrogeologic information was identified during the course of this assessment. Actual groundwater flow directions and depths in the vicinity of the project area cannot be determined without site-specific groundwater monitoring data. In lieu of this data, estimations were made herein based on surface gradient depicted on USGS topographic maps since it is generally recognized that shallow groundwater regionally mimics surface topography with flow toward existing surface water bodies such as rivers and creeks.

The “Summary of the Geology of the Chicago Area” (Willman 1971) describes shallow groundwater in the Chicago area as being limited to sand and gravel horizons in unconsolidated soil and fractured bedrock aquifers. The unconsolidated materials in this area consist primarily of clay with isolated

4.0 GEOLOGY AND NATURAL FEATURES

lenses of sand material and are not considered aquifers. In the Chicago area, bedrock aquifers are found within Silurian, Ordovician and Cambrian formations, which are greater than 50 feet bgs.

GSG reviewed published geologic information to develop an understanding of site geology and anticipated groundwater flow direction. Groundwater flow can be locally impacted by utilities, wells, or other man-induced changes, but generally corresponds with surface topography. The 2018 USGS 7.5-minute Normantown and Romeoville Quadrangles show the western portion of the project area to be sloping generally east towards the West Branch of the DuPage River, starting at an elevation of around 700 feet to around 650 feet. The eastern portion of the project area is generally sloping east towards the East Branch of the DuPage River, starting at an elevation of 690 feet to 670 feet.

4.4 Natural Hazards

4.4.1 Wetlands

According to the U.S. Fish and Wildlife Service National Wetlands Inventory Map, wetlands are present on and to the east of the east end of the project area, on and adjacent to Sites 32 and 33.

These wetlands are classified as two different systems. The first wetland is classified as R2UBHx wetland (Riverine) and the second is classified as a PEM1A wetland (Freshwater Emergent Wetland).

A breakdown of the wetland classifications is provided below:

R2UBHx – Riverine	
R	System Riverine : The Riverine System includes all wetlands and deepwater habitats contained within a channel, with two exceptions: (1) wetlands dominated by trees, shrubs, persistent emergents, emergent mosses, or lichens, and (2) habitats with water containing ocean-derived salts of 0.5 ppt or greater. A channel is an open conduit either naturally or artificially created which periodically or continuously contains moving water, or which forms a connecting link between two bodies of standing water.
2	Subsystem Lower Perennial : This Subsystem is characterized by a low gradient. There is no tidal influence, and some water flows all year, except during years of extreme drought. The substrate consists mainly of sand and mud. Oxygen deficits may sometimes occur. The fauna is composed mostly of species that reach their maximum abundance in still water, and true planktonic organisms are common. The gradient is lower than that of the Upper Perennial Subsystem and the floodplain is well developed.
UB	Class Unconsolidated Bottom : Includes all wetlands and deepwater habitats with at least 25% cover of particles smaller than stones (less than 6-7 cm), and a vegetative cover less than 30%.

4.0 GEOLOGY AND NATURAL FEATURES

R2UBHx – Riverine	
H	Water Regime Permanently Flooded : Water covers the substrate throughout the year in all years.
Other Modifier(s):	
x	SPECIAL MODIFIER Excavated : This Modifier is used to identify wetland basins or channels that were excavated by humans.

PEM1A – Freshwater Emergent Wetland	
P	System Palustrine : The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, persistent emergents, emergent mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean-derived salts is below 0.5 ppt. It also includes wetlands lacking such vegetation, but with all of the following four characteristics: (1) area less than 8 ha (20 acres); (2) active wave-formed or bedrock shoreline features lacking; (3) water depth in the deepest part of basin less than 2.5 m (8.2 ft) at low water; and (4) salinity due to ocean-derived salts less than 0.5 ppt.
EM	Class Emergent : Characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants.
1	Subclass Persistent : Dominated by species that normally remain standing at least until the beginning of the next growing season. This subclass is found only in the Estuarine and Palustrine systems.
A	Water Regime Temporary Flooded : Surface water is present for brief periods (from a few days to a few weeks) during the growing season, but the water table usually lies well below the ground surface for the most of the season.

The FEMA Flood Map, included in **Appendix E**, shows the Site in relation to wetlands included in the National Wetland Inventory.

4.4.2 Floodplains

According to the EDR Database search, the Federal Emergency Management Agency (FEMA) does not indicate the presence of a 100-year floodplain within the project area, except a very small area on the far eastern side of the project area at the intersection of 75th Street and Greene Road, on and adjacent to Sites 32 and 33.. The Overview Map of the Environmental Data Resources Report, included in **Appendix D**, shows the project area in relation to the 100-year flood zone.

FEMA maps typically do not reflect potential local drainage problems or the ability of the local storm water management system to convey the surface water runoff created by storms or other occurrences.

4.4.3 Landslides

GSG reviewed topographic and aerial maps, received from EDR Database Search, between the years 1889 to 2017. None of the maps displayed any landslide information for the project area.

4.4.4 Mine Subsidence

As shown on the Coal Mines in Illinois (IL MINES) online viewer, the closest mine is located approximately 4.5 miles south of the project area. Therefore, mining is not a concern.

4.4.5 Seismicity

GSG reviewed several USGS publications in an effort to describe the regional geological setting in the project area, inclusive of the survey limits at the individual crossings. Site-specific geologic information was not identified during the course of this assessment.

The 2014 U.S. Geological Survey (USGS) National Seismic Hazard Maps display earthquake ground motions for various probability levels across the United States and are applied in seismic provisions of building codes, insurance rate structures, risk assessments, and other public policy.

The 2014 U.S. Geological Survey National Seismic Hazard Maps present probabilistic ground motion for Peak Ground Acceleration (PGA), 1Hz (1.0 second SA), and 5Hz (0.2 second SA). According to 2014 U.S. Geological Survey National Seismic Hazard Maps for the project area, on the 1 second Spectral Acceleration (SA) with 10% probability of exceedance in 50 years map the project area is rated as 0.02 to 0.03 (on the scale from 0 to > 0.4), on the 0.2 second Spectral Acceleration (SA) with 10% probability of exceedance in 50 years map the project area is rated as 0.04 to 0.06 (on the scale from 0 to > 0.8) and on the Peak Ground Acceleration (PGA) with 2% probability of exceedance in 50 years map the project area is rated as 0.06-0.1 (on the scale from 0 to > 0.8).

5.0 DISCUSSION

5.1 Project Sites

The project area is located in an area with commercial and residential properties along W. 75th Street, with residential properties located along the side streets. Findings for each of the individual sites are described in the following subsections and illustrated on the referenced attachments. Field work for this assessment was conducted on May 20, 2019 and included a visual assessment only; no sampling or testing was performed. Site and vicinity photographs are included in **Appendix F**.

5.1.1 Site 1 – 75th Street (Project Area)

75th Street, Naperville, Woodridge, and Unincorporated DuPage County. The site is a four-lane east-west running asphalt roadway. The road is separated by a vegetated median with undeveloped rights-of-way along the roadway.

Available topographic maps indicate that the site was undeveloped until sometime between 1908 and 1923, when the western portion of 75th Street was constructed. The far eastern portion of 75th Street was constructed sometime between 1954 to 1962. The western and eastern portions of 75th Street were connected sometime between 1962 and 1972.

Available historical aerial photographs from 1938 until 1962 depict the site as a mixture of public roadway and agricultural properties. The roadway is present on the west side of the project area, around Millbrook Lane. Sometime between 1962 and 1971, the roadway was constructed, connecting all four intersections. The roadway is depicted on all of the remaining aerial photographs.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.2 Site 2 – Millbrook Drive (Project Area)

Millbrook Drive, Naperville. The site is a two-lane, north-south running asphalt roadway, with left turn lanes onto 75th Street from both northbound and southbound Millbrook Drive. Drainage is directed toward the concrete curbs.

Available topographic maps indicate that the site was undeveloped until 1993, which depicts a roadway north of 75th Street. By 2012 the map depicts the roadway extending south of 75th Street and remains the same to present day.

Available historical aerial photographs from 1939 until 1993 depict the site as farmland. Sometime between 1993 and 1998, the existing roadway was constructed. The remaining aerial photographs depict the site in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.3 Site 3 – Modaff Road (Project Area)

Modaff Road, Naperville. The site is a two-lane north-south running asphalt roadway, with left turn lanes onto 75th Street from both northbound and southbound Modaff Road. Drainage is directed toward the concrete curbs.

Available topographic maps indicate that the site has been a roadway since at least 1892.

Available historical aerial photographs from 1939 until 2017 depict the site as a public roadway.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted

at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

5.1.4 Site 4 – Olympus Drive (Project Area)

Olympus Drive, Naperville. The site is a two-lane north-south running asphalt roadway, with left turn lanes onto 75th Street from both northbound and southbound Olympus Drive. Drainage is directed toward the concrete curbs.

Available topographic maps indicate that the site was undeveloped land from 1892 until 1962. From 1972 to 2012 the site is depicted as a roadway.

Available historical aerial photographs from 1939 until 1962 depict the site as farmland. From 1971 to 2017 the site is depicted as a public roadway.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.5 Site 5 – Greene Road (Project Area)

Greene Road, Woodridge. The site is a two-lane north-south running asphalt roadway, with left turn lanes onto 75th Street from both north-bound and south-bound from Green Road. Drainage is directed toward the concrete curbs.

Available topographic maps indicate that the site has been a roadway since at least 1892.

Available historical aerial photographs from 1939 until 2017 depict the site as a public roadway.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

5.1.6 Site 6 – Hobson Plaza

Hobson Plaza, 931-967 W. 75th Street, Naperville. The site is currently occupied by a one-story strip mall with fifteen (15) storefronts with associated parking on the east side of the site, a one-story commercial building with associated parking on the west side of the site, and a one-story strip mall with twelve (12) storefronts with associated parking on the south side of the site. Six (6) pad-mounted transformers were observed across the site. No signs of stress or stained vegetation were observed in the area around the transformers.

The following stores are present in the large building on the east side of the site:

- Subway (Restaurant)
- Center for Dentistry (Dentist)
- State Farm (Insurance)
- Kym Nail Spa (Nail Salon)
- Q Spa Massage (Spa)
- Prime Care of Naperville (Medical Clinic)
- UPS Store (Shipping and Mail Service)
- Preet Beauties (Beauty Salon)
- State of Illinois Driver Service Facility (Government)
- Edward Jones (Financial Consultant)
- Your Neighbors (Restaurant)
- Pho Thein (Restaurant)
- Play It Again Sports (Used Sporting Goods Retail)
- Garden Fresh Market (Grocery Store)
- Three (3) vacant storefronts

The building on the southwest corner of the site is occupied by Great Clips (Hair Salon) and Oreck (Small Appliance Repair). The remainder of the building is vacant.

The building on the west side of the site is occupied by Buikema's Ace Hardware (Home Improvement Store).

Available topographic maps show the site as undeveloped since at least 1892 until sometime between 1980 and 1993, when the eastern and western buildings have been constructed. No structures are shown on the 2012 map.

Available historical aerial photographs from 1938 until 1973 depict the site as farmland. Sometime between 1973 and 1983, the large shopping plaza building along the east side of the property and the associated asphalt parking lot were constructed. Sometime between 1983 and 1988 the outbuilding on the west side of the site was constructed. Sometime between 1988 and 1993, the remaining building in the southwest corner of the site and additional asphalt parking lot were constructed.

The site is listed in various databases all under the address 931 W. 75th Street, which is located in the southern portion of the eastern building.

The site is listed in the EDR Historical Cleaners database for the address 931 W. 75th Street under the name "Hobson Village Inc" for the years 1992 through 1995 and under the name "All Cleaners" for the years 1997 through 2008.

Under the name "Hobson West", the site is listed in the RCRA-CESQG, FINDS, and ECHO databases. The site is listed as a historic generator the waste code F002 (Spent Halogenated Solvents). No violations were reported.

Under the name "R.D. Hobson Associates" the site is listed in the SRP, Institutional Controls, and Engineering Controls databases. The site was enrolled into the Illinois EPA Site Remediation Program (SRP) on January 27, 1997. A Focused No Further Remediation (NFR) Letter was issued for the site on September 8, 1997, with the following restrictions: Industrial/Commercial land use; Groundwater Use Restriction; Construction Worker Precautions; and the building acting as an engineered barrier. In 2016, the site was re-enrolled into the SRP in order to receive an NFR Letter with no restrictions. A *Combination Site Investigation Report, Remediation Objective Report, Remedial Action Plan, and Remedial Action Completion Report* on October 14, 2016. This report included the advancement of twelve (12) soil borings to 20 feet bgs and converted four (4) of the boring locations to temporary monitoring wells. None of the soil samples exceeded the TACO Tier 1 SROs for Residential or Construction Worker SROs. The groundwater exposure route was eliminated due to background conditions in the area. A Comprehensive NFR Letter was issued on September 8, 2017 with no restrictions or controls.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps

or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

The following RECs have been identified for the site:

- The site is a historical dry cleaner.
- The site is listed in the SRP with a comprehensive No Further Remediation Letter with no restrictions or controls.

The following *de minimis* conditions have been identified for this site:

- Six (6) pad-mounted transformers are present across the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.7 Site 7 – Residential Properties

Residential Properties, 1222-1246 Natchez Trace Circle, Naperville. The site consists of seven (7) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1973. Sometime between 1973 and 1983, the single-family homes were constructed, and the site is depicted in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* conditions have been identified for this site:

- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.8 Site 8 – Hobson West Community Association

Hobson West Community Association, 820 W. Gartner Road, Naperville. The site has one (1) one-story building with three (3) tennis courts, a swimming pool, landscaped areas, and an associated asphalt parking lot. The building appears to be of brick construction and is used as a community recreation center.

Available topographic maps indicate that the site as undeveloped since at least 1892 until sometime between 1972 and 1980, when the site is depicted as occupied by a building. In the maps proceeding 1980, buildings are not shown on the site.

Available historical aerial photographs from 1939 until 1973 depict the site as farmland. The site is depicted on the 1983 aerial photograph in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the building, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* condition has been identified for this site:

- Based on the age of the building, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.9 Site 9 – Fuller’s Car Wash

Fuller’s Car Wash, 952 W. 75th Street, Naperville. The site is occupied by a car wash facility including a building on the western side of the site with a row of vacuum machines towards the central-east side and associated landscape areas. The building appears to be of masonry and cinderblock construction. There are two (2) pad-mounted transformers present along 75th Street on the north side of the site. There were no signs of staining or stressed vegetation around the transformers.

Available topographic maps show the site as undeveloped since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as farmland. Between 1993 and 1998, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Two (2) pad-mounted transformers are present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.1.10 Site 10 – Jiffy Lube

Jiffy Lube, 944 W. 75th Street, Naperville. The site is occupied by a one-story repair shop and oil change facility with an asphalt parking lot. The building appears to be of brick and cinderblock construction.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as farmland. Between 1993 and 1998, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

The following RECs have been identified for the site:

- The site is an active repair shop and oil change facility.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.11 Site 11 – Rose Plaza West

Rose Plaza West, 924 W. 75th Street, Naperville. The site is occupied by a one-story commercial building with numerous storefronts. The building is of brick and masonry construction. There is one (1) pad-mounted transformer present along Millbrook Drive, on the east side of the site. There were no signs of staining or stressed vegetation around the transformer.

The following stores are present on the site:

- Organic Spa & Salon (Salon)
- Tennis Ballerz Pro Shop (Tennis Store)
- Huntington Learning Center (Tutoring Service)
- Ellie’s Deli (Sandwich Shop)
- Fiesta Burrito (Mexican Restaurant)
- Three (3) vacant storefronts

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as farmland. Between 1993 and 1998, the site was developed to its current configuration.

The site is listed in the EDR Historical Cleaners database for the address 924 W. 75th Street under the name “Master Cleaners” from 1999 until 2014.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

The following RECs have been identified for this site:

- The site is a historical dry cleaner.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.1.12 Site 12 – McDonald’s

McDonald’s, 892 W. 75th Street, Naperville. The site is occupied by a one-story standalone restaurant, with associated landscaped areas and an asphalt parking lot. The building is of brick and masonry construction.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as farmland. Between 1993 and 1999, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.13 Site 13 – Rose Plaza East

Rose Plaza East, 860 W. 75th Street, Naperville. The site is occupied by a one-story commercial building with numerous storefronts, associated landscaped areas and an asphalt parking lot. The building is of brick and masonry construction. One (1) pad-mounted transformer is present at the site. No signs of stress or stained vegetation were observed in the area around the transformers.

The following stores are present on the site:

- FedEx Office Print & Ship Center (Shipping and Mailing Service)
- Lady Jane’s Haircuts for Men (Barber Shop)
- T K Nail Salon (Nail Salon)

- Starbucks (Coffee Shop)
- One (1) vacant storefront

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as farmland. In 1998, the onsite building was under construction. By 2007, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.1.14 Site 14 - Baird & Warner Real Estate

Baird & Warner Real Estate, 836 W. 75th Street, Naperville. The site is occupied by a one-story commercial building with numerous storefronts, associated landscaped areas and an asphalt parking lot. The building is of brick and masonry construction. One (1) pad-mounted transformer is present at the site. No signs of stress or stained vegetation were observed in the area around the transformers.

The following stores are present on the site:

- Baird & Warner Real Estate (Real Estate Agency)
- One (1) vacant storefront

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1998 depict the site as farmland. By 2007, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.1.15 Site 15 – Knowledge Beginnings Preschool

Knowledge Beginnings Preschool, 812 W. 75th Street, Naperville. The site is occupied by a single-story preschool building, associated asphalt parking, playground, and a grass and concrete play area. One (1) pad-mounted transformer is located on the site. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1938 until 1993 depict the site as undeveloped. In 1998, a dirt road and a small area of disturbance are visible. By 2007, the site was developed to its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.1.16 Site 16 – Residential Properties

Residential Properties, 408-448 Tupelo Avenue and 1245 Modaff Road, Naperville. The site consists of twelve (12) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. In 1962, Tupelo Avenue is under construction. Sometime between 1962 and 1971, the residential properties are shown in their current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* condition has been identified for this site:

- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.17 Site 17 – Tupelo Drive

Tupelo Drive, Naperville. The site is occupied by a two-lane east-west running asphalt roadway, with a parking lane on each side. Drainage is directed to the concrete curbs.

Available topographic maps show the site as undeveloped since at least 1892 until sometime between 1954 and 1962, when the western portion of the road is first shown on the map. Sometime between 1962 and 1972, the remainder of the road is constructed.

Available historical aerial photographs from 1938 until 1954 depict the site as agricultural land. Sometime between 1954 and 1962 a portion of the roadway near Modaff Road was constructed, with the remainder of the site constructed between 1962 and 1971.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based on the date of construction of the buildings, prior to 1926, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.18 Site 18 – Residential Properties

Residential Properties, 308-344 Tupelo Avenue and 1244 Modaff Road, Naperville. The site consists of eleven (11) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways. Two (2) pad-mounted transformers are located on the site along W. 75th Street. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. In 1962, Tupelo Avenue in under construction and two (2) homes are under construction. Sometime between 1962 and 1971, the residential properties are shown in their current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.

- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.19 Site 19 – Residential Properties

Residential Properties, 156-228 Tupelo Avenue and 1242 Olympus Drive, Naperville. The site consists of thirteen (13) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways. One (1) pad-mounted transformer is located on the site along W. 75th Street. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. Sometime between 1962 and 1971, Tupelo Avenue in under construction and several homes are under construction. By 1973, the residential properties are shown in their current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.20 Site 20 – Residential Properties

Residential Properties, 108-144 Tupelo Avenue, 1244 Olympus Drive, and 1245 Clyde Drive, Naperville. The site consists of thirteen (13) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways. Three (3) pad-mounted transformers are located on the site along W. 75th Street. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. In 1962, Tupelo Avenue is under construction. By 1971, several homes are under construction. By 1973, the residential properties are shown in their current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Three (3) pad-mounted transformers are located on the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.21 Site 21 – The Ponds of Naperville Apartments

The Ponds of Naperville Apartments, 1301-1333 Modaff Road, Naperville. The site is occupied by an apartment complex consisting of six (6) three-story apartment buildings, a one-story “Leasing Center and Clubhouse”, a swimming pool, a volleyball court, associated landscaped areas, and parking lots. Twelve (12) pad-mounted transformers are located on the site. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps indicate that the site has been undeveloped from before 1892. By 1923, a large structure was constructed in the center of the site. By 1953, two small structures are shown on the site, with one of the small structures in a similar location to the previous structure. By 1954, the map only shows the one large structure on the site. By 1962, two small structures are shown on the site, with one of the small structures in a similar location to the previous structure. By 1972, the map only shows the one large structure on the site. The 1980 map shows the site similar to the 1972 map, with the addition of a small structure on the western portion of the site. By 1993, the circular road around the complex has been constructed. From 1993 until the 2012 map, structures are no longer shown on the map.

Available historical aerial photographs from 1938 show the site as occupied by a small farm with numerous small structures, surrounded by farmland. The site remains unchanged until sometime between 1971 and 1973 when the farm buildings have been razed. The site remains undeveloped until sometime between 1983 and 1988 when the apartment complex is under construction, with three (3) of the three-story apartment buildings having been constructed and the foundations of the remaining three (3) three-story apartment buildings appear to have been constructed. By 1993, the complex is shown in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Twelve (12) pad-mounted transformers are located on the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.22 Site 22 – Naperville Electric Utility – Modaff Electrical Substation

Naperville Electric Utility – Modaff Electrical Substation, 1312 Modaff Road, Naperville.
The site is occupied by an electrical substation occupied by numerous transformers.

Available topographic maps indicate that the site has been undeveloped since at least 1900.

Available historical aerial photographs from 1938 until 1962 depict the site as occupied by farmland. By 1971, a small area of disturbance is visible on the western half of the site. By 1973, the disturbed area has been expanded to cover the entire site. By 1983, electrical equipment was installed on the site. Sometime between 1983 and 1993, additional electrical equipment was installed. Sometime between 1998 and 2007, additional electrical equipment was installed in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps

or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

The following RECs have been identified for this site:

- The site is an active electrical substation.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.23 Site 23 – Naperville Fire Department Station 8

Naperville Fire Department Station 8, 1320 Modaff Road, Naperville. The site is occupied by a one-story fire station, driveway and parking lot, and associated landscape areas.

Available topographic maps show the site as undeveloped since at least 1892, with the fire station only shown on the 2012 map.

Available historical aerial photographs from 1938 until 1971 depict the site as farmland. Sometime between 1971 and 1973, the ground appears to have been disturbed, which appears to be from construction work. By 1983, a residential structure has been constructed on the site. By 1988, a pool was constructed to the rear of the residential structure. Sometime between 1993 and 1998, the residential structure has been razed. Sometime between 1998 and 2007, the fire station was constructed in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the building, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.24 Site 24 – Residential Properties

Residential Properties, 1301-1307 Frederick Lane, 1306 Carol Lane, and 249-251 Bay Colony Drive, Naperville. The site consists of seven (7) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways. One (1) pad-mounted transformer is located on the site along W. 75th Street. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1971. Sometime between 1971 and 1973, Frederick Lane, Carol Lane, and Bay Colony Drive have been constructed. By 1983, the majority of the residential structures have been constructed, with a few lots remaining undeveloped. By 1988, an additional residential structure was constructed. Sometime between 1998 and 2007, the final residential structure was constructed, and the site appears in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is located on the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.25 Site 25 – Residential Properties

Residential Properties, 201-241 Bay Colony Drive, Naperville. The site consists of twelve (12) one-story and two-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways. One (1) pad-mounted transformer is located on the site along W. 75th Street. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. Sometime between 1962 and 1971, the ground appears to have been disturbed across the site. By 1973, Bay Colony Drive has been constructed. By 1983, the majority of the residential structures have been constructed, with one lot remaining undeveloped. By 1988, the final residential structure was constructed, and the site appears in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is located on the site. No signs of staining or stressed vegetation were observed.
- Based on the age of the buildings, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.26 Site 26 – Bay Colony Drive

Bay Colony Drive, Naperville. The site is occupied by a two-lane east-west running asphalt roadway, with a parking lane on each side. Drainage is directed to the concrete curbs.

Available topographic maps show the site as undeveloped since at least 1892 until sometime between 1962 and 1972, when the road is first shown on the map.

Available historical aerial photographs from 1939 until 1962 depict the site as agricultural land. Sometime between 1962 and 1973, the site is under construction. Sometime between 1973 and 1983, site construction is completed and appears in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.27 Site 27 – Residential Property

Residential Property, 1311 Olympus Drive, Naperville. The site is occupied by a two-story residential property with a concrete driveway, attached garage and associated landscape areas. The building appears to be of brick and wood construction.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1939 until 1962 depict the site as agricultural land. Sometime between 1962 and 1971, the site is under construction. Sometime between 1973 and 1983, the residential structure was constructed and appears in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site. Based on the date of construction of the buildings, both ACM and LBP are suspected to be present at the site.

No RECs have been identified for this site.

The following *de minimis* condition has been identified for this site:

- Based on the age of the building, ACMs and LBPs are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.28 Site 28 – Lincoln Junior High School

Lincoln Junior High School, 1320 Olympus Drive, Naperville. The site is occupied by a large one-story school building, with two (2) asphalt parking lots and associated landscaped and play areas. There is a paved area in the center of the site that is occupied by four (4) basketball hoops. There are three (3) pad-mounted transformers on the north side of the site. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892. Sometime between 1962 and 1972, a large structure was constructed on the western side of the site. Beginning in 1993, the building on the site is labelled as the “Lincoln Jr High School” until 2012 when the map does not show any building or have any labels.

Available historical aerial photographs from 1939 until 1962 depict the site as agricultural land. Sometime between 1962 and 1971, the site was developed with a large building on the west side of the site with two parking lots and two paved play areas. By 1988, an addition has been constructed on the eastern side of the site and the site appears in its current configuration.

The site is listed in the UST database for one (1) 10,000-gallon heating oil UST. The tank was installed at an unknown time and was removed on June 15, 1990.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

The following RECs was identified for this site:

- One (1) 10,000-gallon heating oil UST was present at the site. The UST was installed at an unknown time and removed on June 15, 1990.

The following *de minimis* condition has been identified for this site:

- Three (3) pad-mounted transformers are present on the north side of the site. There were no signs of stress or strained vegetation in the area around the transformers.
- Based on the age of the building, ACMs and LBPs are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.29 Site 29 – Naperville Water Tower

Naperville Water Tower, 1301-1303 Clyde Drive, Naperville. The site is occupied by a water tower and three (3) one-story buildings. The buildings appear to be of brick and cinderblock construction. The water tower appears to be of metal construction. There is one (1) pad-mounted transformer in the northwest corner of the site. No signs of stress or stained vegetation were observed in the area around the transformer.

Available topographic maps show the site with no indications of development since at least 1892. Sometime between 1954 and 1962, a “water tower” structure was shown on the map. Sometime between 1962 and 1972, a small structure to the east of the water tower was constructed. By the

1993 map, the small structure is no longer shown. By 2012, the map does not show any buildings or have any labels.

Available historical aerial photographs from 1939 until 1962 depict the site as agricultural land. Sometime between 1962 and 1971 the water tower appears to have been constructed; however, the picture quality is too poor to determine what other buildings, if any, are present at the site. Sometime between 1971 and 1973, a small one-story building has been constructed on the west side of the site. Sometime between 1973 and 1983 a one-story building has been constructed north of the water tower. By 1988, a building covering the southern half of the site has been constructed and by 1993, the southern building appears to have a grass-covered roof, with the site depicted in its current configuration.

The site is listed in the IL UST, SEMS Archive, and IL SSU databases. The site is listed in the IL Underground Storage Tank (UST) database for one (1) active 500-gallon diesel fuel UST. The tank was listed as installed on January 1, 1988. The site is listed in the Superfund Enterprise Management System (SEMS) Archive database listed as “Not on the NPL”. The site is listed in the Illinois EPA’s State Sites Unit (IL SSU) database as a “Groundwater Contamination” Facility Type.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, both ACM and LBP are suspected to be present at the site.

The following RECs was identified for this site:

- One (1) active 500-gallon diesel fuel UST.

The following *de minimis* condition has been identified for this site:

- One (1) pad-mounted transformer is present on the north side of the site. There were no signs of stress or strained vegetation in the area around the transformer.
- Based on the age of the building, ACMs and LBPs are suspected to be present.
- The site was historically utilized as agricultural land.

5.1.30 Site 30 – Woods of Hobson Greene - Residential Properties

Woods of Hobson Greene - Residential Properties, 23W255-23W341 Hampton Circle, Naperville. The site consists of eight (8) two-story and three-story single-family homes with attached garages, associated landscaped areas, and asphalt or concrete driveways.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland and forested from 1939 until 1988. Sometime between 1988 and 1994, Hampton Circle and several residential structures have been constructed. By 1998, two additional residential structures have been constructed. By 2007, the final residential structures were constructed, with the site depicted in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.31 Site 31 – Woods of Hobson Greene – Detention Basin

Woods of Hobson Greene – Detention Basin, Hampton Circle, Naperville. The site is occupied by a detention basin.

Available topographic maps show the site with no indications of development since at least 1892. Sometime between 1908 and 1923, a structure was constructed on the site. Full coverage of the site was not provided for 1954. The structure remains on the maps until the 1980, when the site became vacant. The site remained undeveloped through the 2012 map.

Available historical aerial photographs depict the site in 1939 as farmland with a small house on the site. The house remained onsite until sometime between 1954 and 1962, when the house was razed. The site remained undeveloped until sometime between 1988 and 1994 when Hampton Circle and the detention basin have been constructed, with the site in its current configuration.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.1.32 Site 32 – Greene Valley Forest Preserve

Greene Valley Forest Preserve, Greene Road and W. 75th Street, Naperville. The site is occupied by a DuPage County Forest Preserve and the Greene Trail. The forest preserve consists of a mix of forested areas and open grassland with associated parking lots. Two (2) pole-mounted transformers were observed along Greene Road. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site in 1939 as farmland and some forested areas. Sometime between 1954 and 1962, W. 75th Street was constructed, dividing the site. Sometime between 1983 and 1988, it appears that the portion of the site on the southwest corner of Greene Road and W. 75th Street has been disturbed and is covered by gravel. By 1994, the disturbed area appears to have been graded and remains undeveloped. Between 1994 and 1998, the Greene Trail has been constructed. The site has remained unchanged since 1998.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Two (2) pole-mounted transformers are present on the east side of Green Street. There were no signs of stress or strained vegetation in the area around the transformers.
- The site was historically utilized as agricultural land.

5.1.33 Site 33 – ComEd Right-of-Way

ComEd Right-of-Way, 8S480 Greene Road, Naperville. The site is occupied by a utility right-of-way corridor with numerous large electrical pylons and a small substation on the south side of W. 75th Street.

Available topographic maps indicate that the site has been vacant since at least 1892. Sometime between 1954 and 1962, the power lines were installed. The power lines remain on the maps until the 2012 map.

Available historical aerial photographs depict the site in 1939 as farmland and some forested areas. Sometime between 1952 and 1954, the power lines have been installed in their current alignment. Sometime between 1954 and 1962, W. 75th Street was constructed, dividing the site. Sometime between 1962 and 1973, a second set of power lines paralleling the original set has been constructed. Sometime between 1988 and 1994, a small substation was constructed on the site and the site has remained unchanged since 1994.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- A small electrical substation is located on the site. There were no signs of stress or strained vegetation in the area around the substation.
- The site was historically utilized as agricultural land.

5.1.34 Site 34 – Residential Properties

Residential Properties, 2-3 Greystone Court and 3801-3802 Gladstone Drive, Naperville. The site consists of four (4) two-story single-family homes with attached garages, associated landscaped areas, and concrete driveways.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland and forested from 1939 until 1998. Sometime between 1998 and 2007, Greystone Court, Gladstone Drive, and the residential structures have been constructed. The site has remained unchanged since 2007.

The site does not appear in any regulatory databases reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- The site was historically utilized as agricultural land.

5.2 Adjoining Sites

GSG conducted a search of federal, state, and other environmental databases for sites with reported environmental concerns on sites adjoining, but not adjacent to, the proposed project area. For certain databases, the search distances may have been expanded in the judgment of the environmental professional.

Based on this expanded search, three (3) sites were identified by various resources.

5.2.1 Site A – Brighton Commons

Brighton Commons, 1292 Rickert Drive, Naperville. The site is currently occupied by a one-story retail strip mall with eight (8) storefronts with associated parking. One (1) pad-mounted transformer is located in the alley behind the building. No signs of stress or stained vegetation were observed in the area around the transformers.

The following stores are present on the site:

- J.P. Liquors (Liquor Store)
- Brighton Cleaners (Dry Cleaner)
- Glitz & Glam Boutique (Boutique)
- Ned Bella Salon (Hair Salon)
- Alwan Dental Care (Dentist)

- Sylvan Learning Center of Naperville (Tutoring Service)
- Precision Fitness (Personal Trainer)
- Pancake Café (Café)

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs from 1946 until 1993 depict the site as undeveloped. Between 1993 and 1998, the site was developed to its current configuration.

The site is listed in the EDR Historical Cleaners, FINDS, RCRA-SQG, SRP, Institutional Controls, Engineering Controls, BOL, and ECHO databases as “Brighton Cleaners”.

The site is listed in the EDR Historical Cleaners database for the address 1292 Rickert Drive under the name “Brighton Cleaners” from 2002 until 2014.

The site is listed in the Resource Conservation and Recovery Act (RCRA) database under “Brighton Cleaners” as a Small Quantity Generator (SQG) for waste codes D003 (Reactive Waste) and F002 (Spent Halogenated Solvents).

The site was enrolled into the Site Remediation Program (SRP) on January 27, 1999 after the completion of a Limited Phase II Investigation, completed in 1998, indicated the presence of tetrachloroethene (PCE) in the site soils and groundwater.

Based on the documents reviewed, six (6) soil borings were completed and six (6) monitoring wells were installed. Utilizing data from the previous Limited Phase II Investigation, a plume of PCE and its daughter chemicals was determined to extend approximately 9.8 feet in depth and 180 feet long. The soil ingestion and inhalation exposure routes were excluded via an engineered barrier consisting of a sealed slab-on-grade foundation. The groundwater ingestion exposure route was excluded via modelling and a deed restriction prohibiting the use of groundwater. A preventative control in the form of a construction worker notification was enacted for the site. The No Further Remediation (NFR) Letter was issued on October 3, 2000 including preventative, engineering, and institutional controls.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

The following RECs have been identified for this site:

- The site is an active dry cleaner.

- The site is listed in the SRP with an NFR Letter with preventative, engineering, and institutional controls.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.2.2 Site B – Mobil Gas Station

Mobil Gas Station, 1304 Plainfield-Naperville Road, Naperville. The site is currently occupied by a gas station with a small convenience store and a car wash. One (1) pole-mounted transformer is present at the site. No signs of stress or stained vegetation were observed in the area around the transformers.

Available topographic maps show the site with no indications of development since at least 1892. Sometime between 1908 and 1923, a structure was constructed on the south side of the site. Sometime between 1923 and 1953, the structure was razed and replaced with a smaller structure on the west side of the site and a small structure on the northeast side of the site. By 1954, the smaller structure on the northeast side of the site is no longer shown but is shown again on the 1962 map. The site remains unchanged until sometime between 1980 and 1993 when the two structures have been razed and replaced with two structures in the site's current configuration.

Available historical aerial photographs from 1946 depict the site as occupied by a farm with numerous associated structures. The site remained mostly unchanged until sometime between 1983 and 1988, when the farm structures were razed and replaced with the buildings currently onsite.

The site is listed in the FINDS, RCRA-SQG, and ECHO databases as "ExxonMobil Oil Corp 12040".

The site is listed in the RCRA database under "ExxonMobil Oil Corp 12040" as a Small Quantity Generator (SQG) for waste codes D000 (Not Defined), D001 (Ignitable Waste), and D008 (Lead).

The site is registered with the Office of the State Fire Marshal under the facility name "Bucky's Express #529". There are currently four (4) active tanks located on the site: a 6,000-gallon "Gasoline – Regular" tank, two (2) 8,000-gallon "Gasoline – Regular" tanks, a 12,000-gallon "Gasoline – Premium" tank, all listed as installed on January 1, 1986. The site was also issued twelve (12) Notices of Violation (NOVs) on March 27, 2019, with one (1) having been previously issued on May 2, 2017, including NOVs for failures of the spill protection and failure to complete the annual leak detection certification. The site is listed as having three LUST incidents that qualify for "LUST Fund Eligibility and Deductibility Determinations".

Two LUST Incidents were closed with the issuance of NFR Letters on November 15, 1996. No additional information is available about these incidents. An Illinois HazMat Report for Incident #H 20040979 was reported on July 12, 2004 after an overflow of an unknown volume of product from a gasoline tank. Ten (10) soil borings were completed and five (5) groundwater wells were installed on the site by Groundwater & Environmental Services, Inc. An NFR Letter was recorded on December 6, 2006 with a groundwater use restriction for the site.

No visual evidence of stressed vegetation, depressions, lagoons or surface impoundments, stained soil, water discoloration, fill, storage tanks (above or underground), protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual odors were noted at the site during the May 20, 2019 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

The following RECs have been identified for this site:

- The site is an active gas station.
- The site had three historical LUST incidents closed with an NFR Letter with a groundwater use restriction for the site.
- There are currently four (4) active tanks located on the site: a 6,000-gallon “Gasoline – Regular” tank, two (2) 8,000-gallon “Gasoline – Regular” tanks, a 12,000-gallon “Gasoline – Premium” tank, all listed as installed on January 1, 1986 with numerous violations.

The following *de minimis* conditions have been identified for this site:

- One (1) pad-mounted transformer is present at the site. No signs of staining or stressed vegetation were observed.
- The site was historically utilized as agricultural land.

5.2.3 Site C – Residential Property

Residential Property, 238 Tupelo Avenue, Naperville. The site consists of one (1) one-story single-family home with an attached garage, associated landscaped areas, and asphalt driveway.

Available topographic maps show the site with no indications of development since at least 1892.

Available historical aerial photographs depict the site as farmland from 1939 until 1962. Sometime between 1962 and 1971, Tupelo Avenue in under construction and the home has been constructed. The site has remained unchanged since 1971.

The site is listed in the EDR Historical Auto database for the address 238 Tupelo Avenue under the name “J Robert Paterek Inc” from 2007 until 2014. Based on the historical information available for the site, GSG believes that this address was never actually a gas station and that the owner’s address was mistakenly reported as the location of the gas station.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the May 20, 2019 site visit. Based upon the age of the building, both ACM and LBP are suspected to be present at the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Based on the age of the building, ACM and LBP are suspected to be present.
- The site was historically utilized as agricultural land.

5.3 Orphan Sites

The following sites that may be in the project area appear in the regulatory databases, and regulatory information was reviewed for these sites, but these sites could not be located. Regulatory records did not contain sufficient information to determine the incident location. Regulatory files for an orphan sites were only reviewed if, in the judgement of the project manager, the site had a reasonable probability of being in the project area. Other orphan sites, not listed below, may be present in the project area as well.

Name	Address	Data Source
Shell Oil #137120	22 West 575 75 th Street, Naperville, IL 60540	LUST, SPILLS
RDS Land Company, LLC	8748 South IL Route 53, Naperville, IL 60565	LUST
100 W. 75 th	100 W. 75 th Street, Woodridge, IL 60517	FINDS

Based on the information provided, GSG was able to discern the location of two (2) of the aforementioned Orphan Sites. The **Shell Oil #137120** site is located on the southwest corner of the intersection of 75th Street and IL Route 53, located approximately 1500 feet to the east of the project area. Due to the distance from this project area, this site does not represent a REC to the project area. The **RDS Land Company, LLC** site is located on the western side of the intersection of IL Route 53 and St. Andrews Drive, located approximately 1.65 miles to the southeast of the project area. Due to the distance from this project area, this site does not represent a REC to the project area.

6.0 CONCLUSIONS

GSG Consultants, Inc. (GSG) completed a Preliminary Environmental Site Assessment (PESA) for the proposed 75th Street Improvement Project located in DuPage County, Illinois. The following are RECs and *de minimis* conditions that have been identified for this site:

1. RECs were identified at the following sites along the project:
 - **Site 6 – Hobson Plaza:** Historical dry cleaner, SRP site with Comprehensive NFR; *Transformers, ACM, LBP, Historical Agricultural Land*
 - **Site 10 – Jiffy Lube:** Active repair shop and oil change facility; *Transformer, Historical Agricultural Land*
 - **Site 11 – Rose Plaza West:** Historical dry cleaner; *Historical Agricultural Land*
 - **Site 22 – Naperville Electric Utility – Modaff Electrical Substation:** Active electrical substation; *Historical Agricultural Land*
 - **Site 28 – Lincoln Junior High School:** UST; *Transformers, ACM, LBP, Historical Agricultural Land*
 - **Site 29 – Naperville Water Tower:** UST; *Transformers, ACM, LBP, Historical Agricultural Land*
2. *De minimis* conditions were identified at twenty-six (26) sites along the project area.
3. No RECs or *de minimis* conditions were identified at two (2) sites along the project area.
4. Other properties that appear on environmental databases as listed in the text were identified on sites adjacent to the proposed project:
 - **Site A – Brighton Commons:** Active dry cleaner, SRP with an NFR Letter with preventative, engineering, and institutional controls; *Transformers, Historical Agricultural Land*
 - **Site B – Mobil Gas Station:** Active gas station, Historical LUST incidents closed with an NFR Letter with a groundwater use restriction, active USTs with violations; *Historical Agricultural Land*
 - **Site C – Residential Property:** *Historical Agricultural Land*
5. For the purposes of this report, the following are considered to be *de minimis* conditions:
 - Normal use of lead-based paint (LBP) on exteriors and interiors of buildings and structures;
 - Use of asbestos-containing materials (ACM) in building construction; and

- Transformers in normal use, unless the transformers were observed to be leaking, appear on an environmental regulatory list, or were otherwise determined to pose a hazard not related to normal uses; and
- Agricultural use of pesticides and herbicides. In addition, most land in Illinois was under agricultural use prior to its conversion to residential, industrial, or commercial development. Pesticides, both regulated and otherwise, may have been used throughout the project area at any time. Unless specifically discussed elsewhere in this report, no information regarding past pesticide use that would be subject to enforcement action was located for this project, and such use is considered a *de minimis* condition.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GSG Environmental Group, LLC. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GSG Environmental Group, LLC. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 518B-4CB4-9BEB
PO # NA
Project 75th Street PESA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 518B-4CB4-9BEB

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GSG Environmental Group, LLC. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GSG Environmental Group, LLC. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

A C A MANAGEMENT SER	1303 PLNFELD NPERVIL	WSW 0 - 1/8 (0.122 mi.)	C17	27

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Next Scheduled EDR Contact: 07/15/2019
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 312-886-6186

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 312-886-6186
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 03/27/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 312-886-6186

Number of Days to Update: 21	Next Scheduled EDR Contact: 07/08/2019
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 312-886-6186

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/22/2019	Source: Department of the Navy
Date Data Arrived at EDR: 03/07/2019	Telephone: 843-820-7326
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 05/10/2019
Number of Days to Update: 41	Next Scheduled EDR Contact: 08/26/2019
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 02/04/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 06/10/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Lists of Registered Storage Tanks

CHICAGO TANKS: CDPH Storage Tanks Listing

This dataset contains Aboveground Storage Tank (AST) and Underground Storage Tank (UST) information from the Department of Public Health's (CDPH) Tank Asset Database. The Tank Asset Database contains tank information from CDPH AST and UST permit applications as well as UST records imported from the historic Department of Environment (DOE) database. This dataset also includes AST records from the historic DOE and pre-1992 UST records from the Building Department.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted.

Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NORMANTOWN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Elliott

Soil Surface Texture: silty clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 41 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	11 inches	16 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
2	5 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
3	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
4	16 inches	40 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
5	40 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: Drummer

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 217-333-4747

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
UNO VEN EPA ID:: ILD984792754	22W535 75TH AVE	0 - 1/8 (0.000 mi.)	A2	8

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the LUST list, as provided by EDR, and dated 01/22/2019 has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

SHELL OIL CO. NFA/NFR Letter: 1996-11-15 Incident Num: 900854 IL EPA Id: 430650061	22 WEST 575 75TH ST.	E 1/4 - 1/2 (0.338 mi.)	5	10

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

EXECUTIVE SUMMARY

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted.

Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

IMPDMENT: Surface Impoundment Inventory

Statewide inventory of industrial, municipal, mining, oil & gas, and large agricultural impoundment. This study was conducted by the Illinois EPA to assess potential for contamination of shallow aquifers. This was a one-time study. Although many of the impoundments may no longer be present, the sites may be contaminated.

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Target Property Map:	5680777 ROMEOVILLE, IL
Version Date:	2012
North Map:	5680801 WHEATON, IL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
---	-------------------------

1701970055B	FEMA Q3 Flood data
-------------	--------------------

<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
--	-------------------------

1707370001A	FEMA Q3 Flood data

1702130019C	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ROMEOVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Fox

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.4
2	3 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

Soil Map ID: 5

Soil Component Name: Ashkum

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	53 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6
2	0 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6
3	11 inches	29 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6
4	29 inches	53 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6

Soil Map ID: 6

Soil Component Name: Sawmill

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Illinois State Geological Survey

Telephone: 217-333-4747

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

County Radon Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Re: Freedom of Information Act Request - 108626

Dear Ms. Vacala:

This letter is in response to your Freedom of Information Act (FOIA) (5 ILCS 140/1 et seq.) request dated May 16, 2019 and received by the Illinois Environmental Protection Agency (Illinois EPA) on May 16, 2019.

The information responsive to your request is attached.

Requested Information
1. Jiffy Lube 2506-944 W 75 th St, Naperville
2. Brighton Car Wash-952 W 75 th St, Naperville

Following a search, the Illinois EPA has determined there to be no information responsive to your request.

Requested Information
1. Naperville-1312 Modaff Road
2. Naperville-1320 Modaff Road

Thank you for your patience in this matter.

Sincerely,

Anwar Johnson

Schaumburg, IL 60173

Dear Jessica Vacala,

The Office of the State Fire Marshal (“OSFM”) received your request for records, pursuant to the Freedom of Information Act, on 05/16/2019. The OSFM has reviewed its files and, unfortunately cannot fulfill your request for the following reason:

- The documentation and/or information you seek is not of the type prepared or maintained by the OSFM.
- We have carefully searched our office records in response to your request. Unfortunately, the OSFM does not have any records that are responsive to your specific request.

Pursuant to Section 9.5 of the Act, “any person whose request to inspect or copy a public record is denied by a public body, may file a request for review with the Public Access Counselor established in the Office of the Attorney General not later than 60 days after the date of the final denial.” Such requests must be in writing, signed by the requester and include (1) a copy of the request for access to records and (2) any response from the OSFM. Further information on such requests contact:

Sarah Pratt
Acting Public Access
Counselor Office of the Attorney General
500 S. 2nd Street
Springfield, Illinois 62706
Phone: 1-877-299-FOIA
(1-877-299-3642)
Fax: (217) 782-1396

For your added convenience, we now also offer electronic submission of FOIA requests. To use this feature please go to <http://www.sfm.illinois.gov/public/foia.aspx> and simply fill out our electronic FOIA request form.

Should you have further questions regarding this matter, please contact me at your earliest convenience.

Sincerely,

A handwritten signature in black ink, appearing to read "Matt Sebek". The signature is stylized with large, sweeping letters and a prominent vertical stroke on the right side.

Matt Sebek
Deputy General Counsel FOIA Officer
Office of the State Fire Marshal
217-785-1011
