Executive Summary

WSP USA, Inc. (WSP) conducted a Preliminary Environmental Site Assessment (PESA) for the 63rd Street Sidewalks Project in Woodridge, DuPage County, Illinois. This PESA report was prepared for the DuPage County Division of Transportation (DuDOT), the User. The PESA was conducted in general conformance with the scope and limitations of *A Manual for Conducting Preliminary Environmental Site Assessments for Illinois Department of Transportation Highway Projects* and applicable portions of the *American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Standard E1527-13)*.

The subject property is an 0.92-mile section of DuDOT right-of-way (ROW) on the south side of 63rd Street/Hobson Road from Woodridge Drive to Janes Avenue, where the User intends to conduct roadway construction and public improvements at the subject property.

WSP reviewed the previous PESA prepared for the project by V3 Companies dated May 2, 2017, then conducted a review of available local, county, state, and federal documents; examined historical aerial photographs, topographic maps, and city directories, and conducted a visual inspection of the subject property. The information obtained by WSP for the subject property did not identify recognized environmental conditions (RECs) historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) that would indicate the subject property may have been impacted by current or past activities on the property or surrounding areas. One *de minimis condition* was identified at the subject property. The following is a summary of findings:

- The subject property is an existing roadway adjoined on the south and north by residential properties and on the west and east by commercial and residential properties. There are no structures within the ROW.

- The area including and surrounding the subject property has paved streets and is serviced by electric, natural gas, potable water, and sanitary and storm sewer utilities.
- A gas pipeline runs through parcel 08-23-203-026 of the subject property. No leaks or incidents have been identified at the subject property through either the Environmental Data Resources, Inc. (EDR) data search or WSP's search of the National Pipeline Mapping System website (NPMS). The presence of the gas pipeline at the subject property is considered a *de minimis* condition.
- The site reconnaissance did not identify evidence of denuded vegetation, stained soils, pits, ponds, lagoons, or sumps at the proposed project area that may indicate the presence of contamination from commercial or industrial activity.
- WSP advanced soil borings and collected soil samples for laboratory analysis at the east and west extents of the subject property to assess potential impacts from adjoining/nearby properties identified in regulatory databases. The analytical results did not identify the presence of chemical analytes at concentrations above applicable reference concentrations presented in Title 35 of the Illinois Administrative Code (IAC) Part 742, Appendix B, Table A, or 35 IAC 742, Appendix B, Table C.

The following data gaps that were identified as part of this PESA:

- Due to time constraints, the local fire department was not contacted to determine if there were records of department responses to fires, chemical spills, and/or other environmental incidents at the subject property;
- A review of historical county tax records to determine previous ownership of the subject property was not performed; and
- A certified title search inclusive of environmental liens and property use limitations searches was not provided by the User.

1

Introduction

WSP, Inc. (WSP) conducted a Preliminary Environmental Site Assessment (PESA) on behalf of the DuPage County Division of Transportation (DuDOT), the User, for the 63rd Street Sidewalks Project, located in Woodridge, DuPage County, Illinois. The project encompasses an approximately 0.92-mile section of DuPage County right-of-way (ROW) on the south side of 63rd Street/Hobson Road from Woodridge Ave to Janes Avenue, hereinafter referred to as the subject property (see Figures 1-1 through 1-3).

This PESA was conducted in general accordance with the Illinois Geological Survey's *A Manual for Conducting Preliminary Environmental Site Assessments for Illinois Department of Transportation Infrastructure Projects* (ISGS 2014) and the American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM 2013), and includes a review of available local, county, state, and federal documents; an examination of historical aerial photographs, topographic maps, city directories, and a visual inspection of the subject property. The all appropriate inquiries (AAI) was performed in conformance with the standards and practices set forth in AAI (40 CFR Part 312). Photographs taken during visual inspection of the property are presented in Appendix A, the Environmental Data Resources, Inc. (EDR) report is available in Appendix B, historical aerial photos are presented in Appendix C, and topographic maps of the property are available in Appendix D.

Regulatory database searches of the subject property and surrounding area included in the EDR report are provided in Appendix B. This report presents the findings, opinions, and conclusions made as a result of the PESA of the subject property.

1.1 Purpose

The User (DuDOT) intends to conduct roadway construction and public improvements within the subject property. The purpose of this PESA is to identify actual and potential environmental liabilities associated with the subject property that may have an adverse

effect on construction. As such, this assessment addresses recognized environmental conditions (RECs) that indicate an existing release, past release, or material threat of a release of hazardous substance or petroleum product into structures on the property or into the ground, groundwater, or surface waters. This includes: historical recognized environmental conditions (HRECs), such as a past release of hazardous substances or petroleum products that would have been a REC, but was addressed to the satisfaction of the applicable regulatory authorities for unrestricted (residential) use; and controlled recognized environmental conditions (CRECs) resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of applicable regulatory authorities with engineering controls, property use restrictions, or other use limitations that indicate the property is not suitable for unrestricted use. RECs do not include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.

1.2 Detailed Scope of Service

This PESA consisted of the following efforts:

- Review of the previously conducted PESA;
- Evaluation of the risks of neighboring properties upon the subject property and reviewing federal, state, local, and tribal records within the distances specified by ASTM E1527-13 and AAI standards (ranging from 1/8 to 1 mile, depending on the database);
- Conducting file searches of public agencies (e.g., Illinois Environmental Protection Agency [Illinois EPA], State Fire Marshall, fire department, etc.) tasked with oversight relative to water quality and soil contamination issues;
- Review of historical aerial photography of the subject property and the vicinity;
- Review of United States Geological Survey (USGS) topographic maps;
- Search for and review available Sanborn Maps (Appendix E);
- Review City Directories (Appendix F);

- Perform a site reconnaissance of the subject property to view present conditions and assess hazardous substances or petroleum products usage (presence of above ground or underground storage tanks, storage of acids, etc.) and evaluate likely environmentally hazardous site history; and
- Collect soil samples for laboratory analysis and compare the analytical results with applicable reference concentrations. (Appendix G).

The database search of federal and state standard environmental record sources was conducted prior to the site visit. The results of the database search are described in Section 4 of this PESA; a copy of the database radius report is provided in Appendix B.

The site reconnaissance was conducted on November 11, 2020. Mr. Jeffrey Hughes of WSP toured the subject property and observed current conditions and points of interest in the immediate vicinity, as identified during the records review of the property. Photographic documentation of the subject property and project area is provided in Appendix A.

The findings, opinions, and conclusions reported herein are based on information collected from the records reviewed, and observations made during the site visit.

1.3 Limitations and Assumptions

The subject property was observed during the site reconnaissance, and only limited subsurface conditions were investigated during this effort. WSP relied upon the environmental records reported by EDR to provide state and federal environmental records.

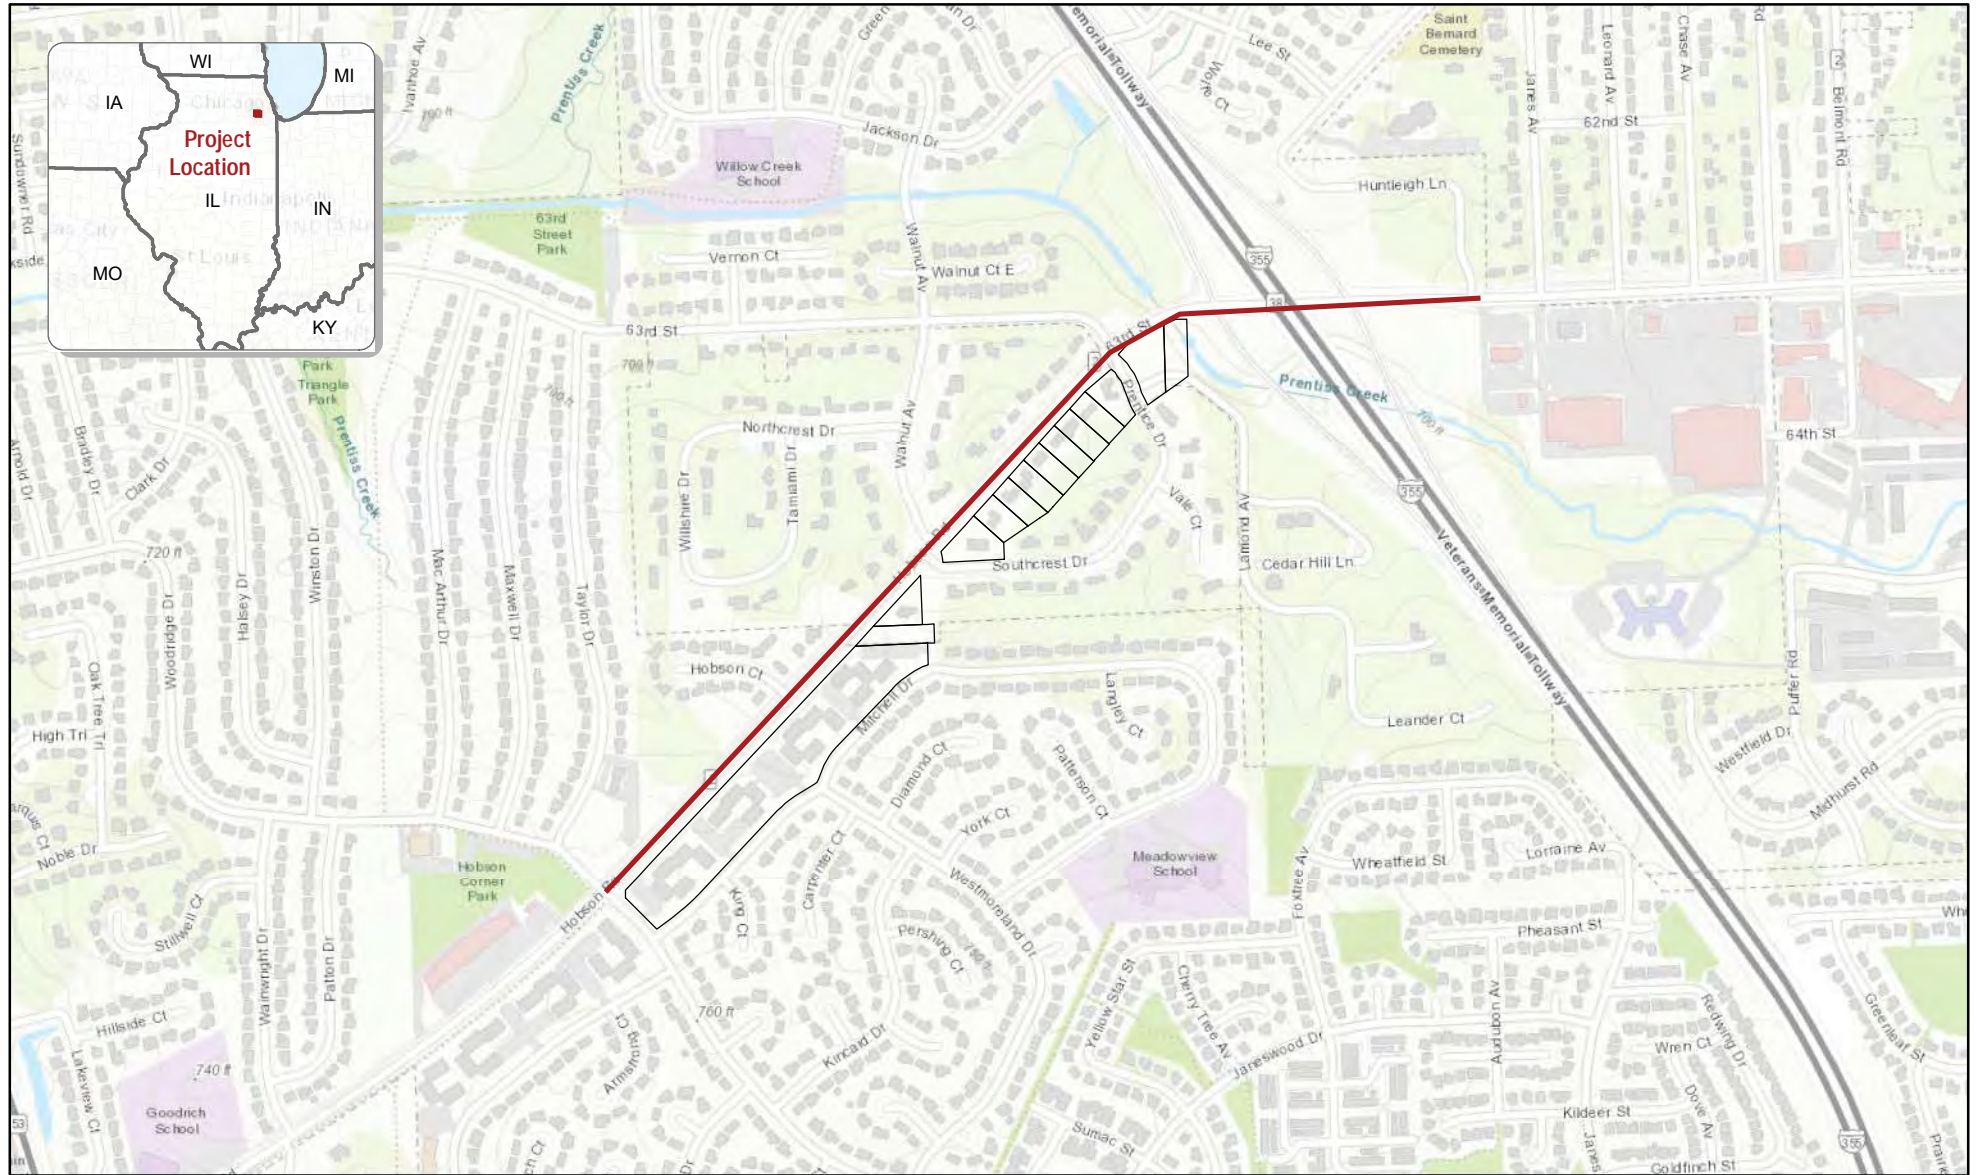

This PESA did not include a certified title search inclusive of environmental liens and property use limitations searches.

1.4 User Reliance

The information presented in this PESA report is based on site observations and data presented in the records reviewed by EDR. This information was accepted as presented and was not independently verified.

This technical report is presented for the User, its agents, successors, and assignees. Though legal and/or regulatory information may be contained herein, said information is not intended to constitute legal advice or opinion and, to the extent such legal advice or

opinion is required, the User is advised to seek the advice of legal counsel. The findings contained herein are limited by the scope of the work specified in the report and the quality and type of information provided and/or made available to WSP for review and is subject to revision if additional or more definitive information becomes available.

Site Review

2.1 Location and Legal Ownership

The subject property is located in the city of Woodridge, DuPage County, Illinois, and is owned by DuPage County. DuPage County tax records were searched to verify the current property owners of land adjacent to the subject property. The results of this search are shown in Section 3.3.

2.2 Subject Property and Vicinity General Characteristics

The subject property is located in an urban/suburban, slightly hilly, portion of DuPage County, Illinois, along the south side of 63rd Street/Hobson Road (Figure 1-2). The subject property is located in the Wheaton and Romeoville Illinois topographic quadrangles and the average elevation of the subject property is 705 feet above mean sea level. Surface topography in the area slopes gently to the southwest.

2.3 Current Use of the Subject Property

The subject property is DuPage County ROW along the south side of 63rd Street/Hobson Road. There are currently no structures in the ROW, although a gas pipeline passes underground. The subject property is surrounded by residential property to the south and north, and commercial and residential property to the east and west. The subject property and surrounding area has paved streets with storm sewers.

2.4 Current Use of the Adjoining Properties

The subject property begins at the intersection of Hobson Road and Woodridge Drive, and extends northeast over I-355 to Janes Avenue (see Figure 1-3). Within 1 mile of the subject property, the area is a combination of residential and commercial development. The subject property is bordered to the south primarily by residences. Residences are located north of the street in the subject property. There is also a Nicor gas pipeline station on the north side of the street. Commercial and residential properties are located to the east and west of the subject property.

Two adjoining properties were identified in regulatory databases. Thornton's #121 is located at 2401 63rd Street, and a Shell gas station (listed in the environmental database as Clark Oil) is located at 3004 Hobson Road at the southwest quadrant of the intersection of Hobson Road and Woodridge Drive. These properties are discussed further in Section 4.

Electric transmission lines are located approximately 0.25-miles west of the subject property on Hobson Road. The Village of Woodridge is served by Commonwealth Edison for electricity and Nicor for natural gas. The Village also receives municipal water supply and sanitary and storm water sewer service.

3

User Provided Information

3.1 General Requirements

The ASTM standard requires that the User of the PESA (DuDOT) perform certain tasks, and provide the following information obtained to the environmental professional conducting the PESA:

- Actual knowledge the client has regarding environmental liens or activity and use limitations in connection with the project site (to comply with ASTM requirements, the client must undertake a review of title and judicial records);
- Specialized knowledge or experience of the client that is material to RECs, controlled RECs, and/or historical RECs, in connection with the project site or nearby properties;
- Information that the purchase price of the site does not reflect the fair market value of the site because of known or suspected contamination at the project site;
- Commonly known or reasonably ascertainable information about the site that the client is aware of within the local community that is material to RECs in connection with the project site; and
- Obvious indicators that point to the presence or likely presence of releases at the project site.

3.2 Title Records, Environmental Liens, Activity, and Use Limitations

The User provided the subject property boundary, as shown on Figure 1-2. A certified title search, inclusive of environmental liens and property-use limitation searches, was not provided by the User. No additional information concerning historical or existing environmental liens for the subject property, historical activities on the property or adjoining properties, or use limitations for the property was provided by the User. This is considered a data gap.

3.3 Specialized Knowledge of the Property

The User provided no extra, specialized information regarding the subject property.

3.4 Owner, Property Manager, and Occupant Information

According to the DuPage County property website (DuPage 2020), the current owners of the properties adjoining the subject property are as listed in Table 3-1. No information was listed in the website for parcels adjacent to I-355.

3.5 Reason for Performing the PESA

This PESA was conducted by WSP for the User to identify RECs in anticipation of proposed roadway improvements at the subject property.

3.6 Other Records

A previous PESA conducted at the subject property by V3 Companies in May 2017 was provided by the User to WSP for review (V3 2017).

4

Records Review

4.1 Standard Environmental Record Sources

4.1.1 Database Description

WSP retained EDR's services to perform a search of reasonably ascertainable government records. EDR conducted a site records search compliant to the requirements of ASTM E1527-13, which included searching a prescribed array of federal and state databases within a prescribed radius of the subject property. Appendix B provides the applicable references for the EDR report. EDR's search of government records, dated November 4, 2020, identified 16 mapped sites on adjacent property addresses. Table 4-1 provides minimum search distances. Appendix B presents the mapped database results.

Table 4-1 Search Distances

Database	Search Distance Radius (miles)
Federal Databases	
CERCLIS	0.50
NFRAP	0.50
NPL	1.00
NPL Delisted	1.00

UST	0.25
AST	0.25
IC/EC	0.50
LUST	0.50

Table 4-1 Search Distances

Database	Search Distance Radius (miles)
SRP	0.50
Dry Cleaners	0.25

Key:

CERCLIS = Comprehensive Environmental Response, Compensation, and Liability Information System
 CORRACTS = Corrective Action Sites
 ERNS = Emergency Response Notification System
 GEN = Generator
 IC/EC = Institutional Controls/Engineering Controls
 LUST = Leaking Underground Storage Tank

NFRAP = No Further Remedial Action Planned
 NPL = National Priorities List (also, Superfund)
 RCRA = Resource Conservation and Recovery Act
 SRP = State Remediation Program
 SWF = Solid Waste Facility
 TSDF = Treatment, Storage, and Disposal Facility
 UST = Underground Storage Tank

4.1.2 Database Search Results

The EDR radius report available in Appendix B includes descriptions of the searched databases; a summary of the findings is presented below.

Federal Records

- **Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS):** CERCLIS contains data on potentially hazardous waste sites that have been reported to the U.S. Environmental Protection Agency (USEPA) by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). CERCLIS contains sites that are either proposed to be or are on the National Priorities List (NPL; also known as “Superfund”), and sites that are in the screening and assessment phase for possible inclusion on the NPL. A review of the CERCLIS list, as provided by EDR, did not identify facilities within a 0.5-mile search radius.
- **CERCLIS – No Further Remedial Action Planned (NFRAP):** As of February 1995, CERCLIS sites with a designation of “NFRAP” have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or contamination was not serious enough to require federal Superfund action or NPL consideration. A review of the CERCLIS – NFRAP list, as provided by EDR, did not identify facilities within the 0.5-mile search radius.

- **National Priority List (NPL):** Also known as “Superfund,” the NPL database is a subset of the CERCLIS and identifies over 1,200 sites nationwide for priority cleanup under the Superfund program. The USEPA is the source of this database. A review of the NPL listings, as provided by EDR, determined that there are no NPL listed facilities within the 1-mile search radius.
- **Delisted from NPL:** The National Oil and Hazardous Substance Pollution Contingency Plan (NCP) establishes the criteria that the USEPA uses to delete sites from the NPL. In accordance with 40 Code of Federal Regulations (CFR) 300.425 (e), sites may be deleted from the NPL where no further response is appropriate. A review of the database determined that there are no delisted NPL sites within the 1-mile search radius.
- **Emergency Response Notification System (ERNS):** ERNS records and stores information on reported releases of oil and hazardous substances. USEPA is the source of this database. A review of the ERNS list indicated there are no facilities within the 0.125-mile radius search.
- **Resource Conservation and Recovery Act (RCRA) Info:** RCRAInfo is USEPA’s comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). Information on RCRAInfo sites is provided by RCRA site type as follows:
 - **RCRA-Corrective Action Sites (CORRACTS):** CORRACTS lists the hazardous waste handlers with RCRA corrective action activity. A review of the CORRACTS list, as provided by EDR, did not identify facilities within the 1-mile search radius.
 - **RCRA-Treatment, Storage, and Disposal Facilities (TSDF):** This database includes selective information on sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. A review of the RCRAInfo database determined that there are no RCRA-TSDF sites within the 0.5-mile search radius.
 - **RCRA-Large Quantity Generator (LQG):** LQGs generate over 1,000 kilograms (kg) of hazardous waste or over 1 kg of acutely

hazardous waste per month. A review of the RCRAInfo database identified one RCRA-LQG site located within the 0.25-mile search radius (see Table 4-2).

- **RCRA-Small Quantity Generator (SQG):** SQGs generate between 100 kg and 1,000 kg of hazardous waste per month. A review of the RCRAInfo database determined there are no RCRA-SQG sites located within the 0.25-mile search radius.
- **RCRA-Very Small Quantity Generator (VSQG):** VSQGs generate less than 100 kg of hazardous waste and less than 1 kg of acutely hazardous waste per month. A review of the RCRAInfo database identified one RCRA-VSQG site located within the 0.25-mile search radius (see Table 4-2).
- **RCRA-Non-Generator (NonGen):** The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste, as defined by RCRA. Non-Generators do not presently generate hazardous waste. One RCRA-NonGen site was identified within the 0.25-mile search radius (see Table 4-2).
- **Federal Institutional Controls/Engineering Controls (IC/EC):** The IC/EC list sites that have either institutional controls or engineering controls. The contaminated media and the type of control implemented are also included in the data. A review of the federal IC/EC database determined that there are no IC/EC sites within the 0.50-mile search radius.
- **Federal Brownfields:** Included in the Brownfields sites listing maintained by the USEPA are Brownfields properties addressed by cooperative agreement recipients and Brownfields properties addressed by targeted Brownfields assessments. The USEPA's Targeted Brownfields Assessment (TBA) program is designed to help states, tribes, and municipalities—especially those without USEPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with Brownfields. A review of the database determined that there were no TBA properties within the 0.50-mile search radius.

State Records

- **Solid Waste Facilities/Landfill (SWF/LF):** SWF/LF-type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The review of the database determined that there were no SWF/LFs within the 0.50-mile search radius.

- **SPILLS:** This is a listing of hazardous materials incidents reported to the Illinois Emergency Management Agency (IEMA). There is also a listing maintained by the Illinois EPA's Office of Emergency Response. No incidents were identified in either database by the EDR search. EDR searched a 0.125-mile radius around the subject property.
- **Leaking Underground Storage Tank (LUST):** The LUST database is an inventory of reported LUST incidents maintained by Illinois EPA. A review of the database revealed that there were three LUSTs within the 0.50-mile search radius (see Table 4-2).
- **Underground Storage Tank (UST):** The UST database contains registered USTs regulated under Subtitle I of the RCRA. The Illinois Fire Marshall maintains these records. A review of the database identified two USTs within the 0.25-mile search radius. A release has been identified from the USTs west of the subject property (see Table 4-2).
- **State IC/EC:** The IC/EC list sites that have either institutional controls or engineering controls. The contaminated media and the type of control implemented are also included in the data. A review of the Illinois EPA IC/EC database determined that there is one IC/EC site within the 0.50-mile search radius. The Yorktown Cleaners at 3046 Hobson Road has restrictions on land use or other activities.
- **Bureau of Land (BOL):** The BOL data results are cross-linked with online database applications from Illinois EPA – BOL and USEPA Facility Registry Services databases. EDR searched a 0.125-mile radius around the subject property. There are no sites listed within the search radius.
- **Tier 2:** This database is maintained by IEMA and includes facilities that store or manufacture hazardous materials and submit a chemical inventory report. EDR did not search beyond the subject property. There are no sites listed within the search radius.
- **Site Remediation Program (SRP):** The SRP database lists the status of sites involved in a voluntary remediation program. There is one SRP site listed within the 0.50-mile search radius (see Table 4-2).

- **Dry Cleaners:** Dry cleaner facility lists are derived from the Illinois Drycleaner Environmental Response Trust Fund records. Historical dry cleaner site listings are based upon EDR's proprietary records. A review of the listings has determined that there are two historical dry cleaner sites mapped within the 0.25-mile search radius (see Table 4-2).

Table 4-2 EDR Mapped Sites

Site No.	Site	Site Part of Subject Property	RCRA-LQG	RCRA-VSQQ	RCRA NonGen/NLR	FINDS/ECHO	SRP/IC	SPILLS	UST	LUST/BOL	AST	EDR Hist Cleaner	EDR Hist Auto	Comments
A1	Oil Experts 2449 63 rd Street Downers Grove, IL 60517												•	Current auto repair center with a new name. The facility is not part of the subject property.
2	Verizon Wireless-Tank #1-190 2605 63 rd Street Downers Grove, IL 60517												•	It appears the site was incorrectly mapped in the EDR report, as there is no evidence of this facility or an AST near the subject property. It appears the facility was located in the strip mall east of the subject property.
3	Goodrich School Hobson Rd. and Route 53 Woodridge, IL 60517					•								Inclusion in these databases does not necessarily mean there was an environmental problem at the site. This site is east of and downgradient from the subject property.
A4	Thornton's #121 2401 63 rd Street Woodridge, IL 60517								•					This site is a current gas station with five USTs in use, south of subject property.
A5	Thornton's #121 2401 63 rd Street Woodridge, IL 60517												•	This site is a current gas station, see above.
6	Vander Poll Cleaners 2830 Mitchell Drive, Apt 5 Woodridge, IL 60517												•	The address listed is an apartment complex and there is no evidence that it was ever a commercial cleaners (aerial photos and site visit). This address may have been the owner's home address.
B7	Almereaz Stacy 3004 Hobson Road Woodridge, IL 60515												•	This site is a current gas station, northwest of the subject property.
B8	Austin Oil, Inc. 3004 Hobson Road Woodridge, IL 60515								•					This site is a current gas station with three USTs in use and two USTs that have been removed.
B9	M-Cubed Petro Five 3004 Hobson Road Woodridge, IL 60517							•		•				Appear to be two LUST incidents reported, with one NFR letter issued. Site is northwest of subject property and downhill.

4-7

Table 4-2 EDR Mapped Sites

Site No.	Site	Site Part of Subject Property	RCRA-LQG	RCRA-VSQQ	RCRA NonGen/NLR	FINDS/ECHO	SRP/IC	SPILLS	UST	LUST/BOL	AST	EDR Hist Cleaner	EDR Hist Auto	Comments
B10	Clark Oil Station No 1358 3004 Hobson Road Woodridge, IL 60515				•	•								This site is a current gas station, see three sites above.
11	ABC One Hour Cleaner 2301 63 rd Street Woodridge, IL 60517											•		This site is not part of the subject property.
12	Target Store 0866 2333 63 rd Street Woodridge, IL 60517		•											This site is a current department store located east of the subject property.
13	Walgreens 2720 6240 Belmont Downers Grove, IL 60516			•		•								Site is currently a pharmacy, east of the subject property.
14	Yorktown Cleaners 3046 Hobson Road Woodridge, IL 60517						•							Site is not part of subject property.
15	Exxon Mobil Oil 2181 63 rd Street Downers Grove, IL 60515									•				Site is current gas station, east of the subject property.
16	Woodbridge Sch Dist 6 3450 Hobson Road Woodridge, IL 60517									•				NFA/NFR letter issued for incident in 2004. Site is west of subject property.

4-8

4.2 Physical Setting Sources

4.2.1 Topography

The subject property lies within the Wheaton and Romeoville 7.5 series topographic quadrangles. The subject property slopes gently downward from east to west with an average elevation of 706.6 feet above mean sea level. The general topographic gradient is southwest.

4.2.2 Regional Geology and Hydrogeology

The subject property is located within the Des Plaines – Illinois River Watershed (ISWS). The Illinois River watershed covers 44% of the state of Illinois and is a major tributary of the Mississippi River. Water wells listed in the EDR report have depths ranging from 72 to 245 feet deep.

Based on a review of Circular 532, *Potential for Contamination of Shallow Aquifers in Illinois* (ISGS 1984), the predominant soil types in the area of the subject property are comprised of Type E soil, described as “Uniform, relatively impermeable silty or clayey till at least 50 feet thick; no evidence of the interbedded sand and gravel.”

The EDR report physical source summary indicates that soil compositions in the general area of the subject property consist of the Markham, silt loam; Orthents, clayey, silty clay; and Sawmill, silty clay loam.

4.2.3 Physical Setting Sources

The subject property area is located in Major Land Resource Area (MLRA) 110, as identified in the U.S. Department of Agriculture’s Natural Resources Conservation Service Handbook 296, *Land Resource Regions and Major Land Resource Areas of the United States, the Caribbean, and the Pacific Basin* (USDA 2006). This area includes Milwaukee, Wisconsin, Chicago and the surrounding western and southern suburbs, and Merrillville, Indiana. The area is 65% farmland and 22% is used for urban development. Based on field observations and a review of historical aerial imagery, the subject property was previously farmland with a flat topography and is currently urban/suburban developed.

4.3 Historical Use Information on the Subject Property and Adjoining Properties

Based upon review of historical aerial photographs dated to 1939, as presented in Section 4.3.2, and topographic maps dated to 1941, as presented in Section 4.4.3, the subject

property appears to have been undeveloped agricultural land prior to being suburban mostly residential land.

4.3.1 County Records Review

A review of historical conveyance records of the DuPage County tax records was not performed. This is considered a data gap.

4.3.2 Historical Aerial Photograph Review

WSP reviewed available historical aerial photographs, and findings are summarized in Table 4-2. Historical aerial photographs are provided in Appendix D for the years 1939, 1946, 1952, 1955, 1962, 1972, 1974, 1983, 1993, 1998, 2007, 2011, 2014, and 2017. The subject property is outlined in the photographs. The aerial photographs show the subject property was undeveloped before residential construction was first visible in the 1962 aerial.

Table 4-3 Review of Historical Aerial Photographs

Year	Subject Property and Vicinity	Adjacent Properties
1939	The subject property is mostly undeveloped, there is a large structure west of where 63 rd Street becomes Hobson Road and runs diagonally.	North: North side of 63 rd Street/Hobson Road is undeveloped. East: Undeveloped area. South: Undeveloped area. West: Mostly undeveloped, small home to the southwest.
1946	No significant changes are visible.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: An additional homestead is visible in the southwest.
1952	A few additional structures are noted near the original large structure. Two small structures are noted on 63 rd Street.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
1955	No significant changes are visible.	North: A homestead is visible near the bend of 63 rd Street. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.

Table 4-3 Review of Historical Aerial Photographs

Year	Subject Property and Vicinity	Adjacent Properties
1962	A small residential development is visible in the area of the original structures.	North: A small residential development is visible on the north side of Hobson Road. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
1972	More residences are visible. Apartment complex at southwest end of subject property is visible. Woodridge Drive is visible.	North: No significant changes are noted. East: No significant changes are noted. South: More residences are visible. West: More small development is visible.
1974	No significant changes are visible.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
1983	No significant changes are visible.	North: No significant changes are noted. East: No significant changes are noted. South: More residential development is visible. West: No significant changes are noted.
1993	I-355 is visible.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
1998	Gas station at 2401 63 rd Street is visible.	North: No significant changes are noted. East: Strip mall is visible. South: No significant changes are noted. West: No significant changes are noted.
2007	Auto repair facility is visible at 2449 63 rd Street.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
2011	No significant changes are visible.	North: Gas pipeline station is visible. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.
2014	No significant changes are visible.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted.

Table 4-3 Review of Historical Aerial Photographs

Year	Subject Property and Vicinity	Adjacent Properties
2017	No significant changes are visible.	North: No significant changes are noted. East: No significant changes are noted. South: No significant changes are noted. West: No significant changes are noted

4.3.3 Historical Topographic Map Review

Topographic data were obtained from the current USGS 7.5-minute topographic maps and historical USGS 15-minute and 7.5-minute topographic maps obtained from EDR show the subject property and surrounding area. Review of topographic maps for the years 1908, 1948, 1954, 1962, 1972, 1973, 1980, 1993, 1998, and 2012 did not reveal the presence of large scale development in the area of the subject property (see Appendix D).

4.3.4 Sanborn Fire Insurance Map Review

Sanborn Fire Insurance maps were unavailable for the subject property and immediate vicinity (see Appendix E).

4.3.5 City Directory Review

City directories were provided by EDR for Hobson Road for 1969, 1971, 1976, 1981, 1986, 1992, 1995, 2000, 2005, 2010, 2014, and 2017 and are included as Appendix F. The majority of the listings are for single family dwellings, with some churches and small commercial entities also listed. No industrial or manufacturing listings appear in the directories.

4.3.6 Environmental Liens Records

The EDR database search did not include a search for environmental liens filed on the subject property by the USEPA or by Illinois EPA.

4.4 Additional Research

In addition to the EDR data search, WSP reviewed the Illinois Geological Survey’s on-line Illinois Oil and Gas Resources Interactive Map (ISGS). This database provides location and data on oil and gas wells and identifies known well fields. There were no oil wells identified within the subject property.

WSP also used the National Pipeline Mapping System Public Map Viewer website (NPMS). WSP searched the subject property for the presence of gas and hazardous material pipelines and breakout tanks as well as accidents (for liquid pipelines) and incidents (for gas pipelines) involving pipelines. One gas pipeline observed by WSP during the site reconnaissance is shown. No other pipelines or wells were identified, and no gas pipeline incidents were identified on the subject property.

5

Site Reconnaissance

5.1 Site Observations

Site reconnaissance of the subject property was conducted by Jeffrey Hughes of WSP on November 11, 2020, to obtain information as to the likelihood of RECs being present on the property, as specified in the ISGS PESA manual and/or ASTM E1527-13. The observations made during the site visit are presented in this section. Exteriors of adjacent properties, nearby areas of potential concern identified in state and local records, and areas identified as suspect during the database review were also observed to the extent practical from the borders of the property and from public roads. Appendix A includes photographs of the areas mentioned and site observations, as listed below. The findings of the site reconnaissance are as follows:

- There are no structures in the ROW. The subject property is adjoined on the south and north by residential properties and on the west and east by commercial and residential properties.
- The area including and surrounding the subject property has paved streets and is serviced by electric, natural gas, potable water, and sanitary and storm sewer utilities. A gas pipeline runs underneath parcel 08-23-203-026 of the subject property (see Figure 1-3). No leaks or incidents have been identified at the subject property through either the EDR data search or WSP's search of the National Pipeline Mapping System website (NPMS).
- The site reconnaissance did not identify evidence of denuded vegetation, stained soils, pits, ponds, lagoons, or sumps at the proposed project area that may indicate the presence of contamination from commercial or industrial activity.
- Gas stations were observed adjacent to the east and west ends of the subject property (Thornton Gas Station and the Shell Gas Station). These are the only two sites on or adjacent to the subject property with active USTs.

5.2 Soil Sampling and Analysis

Following the site reconnaissance, WSP advanced soil borings and collected soil samples for laboratory analysis at two UST sites to assess potential impacts from gasoline stations adjoining the subject property (Thornton Gas Station and the Shell Gas Station). Soil sample locations ENVMT-06-B01 and ENVMT-06-B02 are shown on Figure 1-3. WSP used a truck-mounted Geoprobe[®] direct-push sampling device to advance the borings, and subsurface soil intervals were screened for volatile organic compounds (VOCs) using a calibrated photoionization detector (PID). VOCs were not detected during sample screening, and WSP collected one sample at each location to be analyzed for VOCs, semi-volatile organic compounds, polychlorinated biphenyls, total metals, pH, and toxicity characteristic leaching procedure metals. The analytical results did not identify an exceedance of the residential soil remediation objectives presented in Title 35 of the Illinois Administrative Code (IAC) Part 742, Appendix B, Table A, or 35 IAC 742, Appendix B, Table C. Laboratory results for the samples are included as Appendix G.

6

Interviews

6.1 Interview with Owner/Occupants and User

DuDOT and the Illinois Toll Highway Authority (Illinois Tollway) own the ROW to be used for the project and are not purchasing or acquiring land for the project. Therefore, the User questionnaire was not used. DuDOT provided WSP with a previous PESA performed at the subject property (see Section 6.4).

6.2 Interviews with Adjoining Property Owners

Residential and business owners hold the adjoining properties. Due to time constraints, WSP did not interview adjoining property owners while on the subject property.

6.3 Interviews with Local Officials

Due time constraints, WSP did not interview local or state officials, including the fire department, regarding the subject property. This is considered a data gap.

6.4 Previous Environmental Reports

V3 Companies prepared a previous PESA of the subject property in May 2017 (V3 2017). The previous PESA did not identify RECs for the subject property. The following data gaps were identified in the PESA completed by V3 Companies:

- Information regarding the chain-of-title ownership history or environmental liens recorded against the Site was not provided by the *User*. Environmental lien searches were not conducted as part of the scope of work for this Project.
- The *User* Questionnaire was not provided for this assessment.
- Fire insurance maps were not available.

This page intentionally left blank.

7

Data Gaps

ASTM E1527-13 requires that data gaps that may affect the Environmental Professional's ability to identify RECs are reported. Data gaps that were encountered during this PESA include the following:

- Due to time constraints, the local fire department was not contacted to determine if there were records of department responses to fires, chemical spills, and/or other environmental incidents at the subject property;
- A review of historical county tax records to determine previous ownership of the subject property was not performed; and
- A certified title search inclusive of environmental liens and property use limitations searches was not provided by the User.

This page intentionally left blank.

8

Conclusions

WSP conducted this PESA for the 63rd Street Sidewalks Project, in DuPage County, Illinois, in general conformance with the scope and limitations of the ISGS PESA guidance and ASTM E1527-13, Exceptions to, or deletions from, this practice are described in the respective sections of this report. Through this assessment, no evidence of RECs, HRECs, or CRECs in connection with the subject property have been identified.

The analytical results from soil samples collected at the subject property did not indicate impacts to the subject property from adjoining UST sites. Detected analyte concentrations were below applicable state regulatory criteria.

This assessment did not include:

- Extensive collection, testing, or chemical analysis of samples of soil, groundwater, surface water, wastewater, building materials, or other materials that were or could have been on the subject property;
- Interviews with past owners, tenants, employees, or neighboring landowners regarding past site use, waste generation, and disposal practices (including disposal at remote sites), or manufacturing processes that may have contributed to environmental contamination at the subject property; and
- Evaluation of the potential risks associated with identified concerns from records searches with incomplete addresses, location listings, or sites where no records were available for review.

The review of public records, information provided by the User, and site reconnaissance revealed one *de minimis condition* as follows:

- A natural gas pipeline was observed on the subject property during the site reconnaissance. There is no evidence of a leak or incident

involving the pipeline at the subject property. The presence of the gas pipeline is considered a *de minimis condition*.

Data gaps that prevented the Environmental Professional from determining whether additional RECs exists include:

- Due to time constraints, fire department officials were not contacted regarding department responses to fires, chemical spills, or other incidents at the subject property;
- A review of historical county tax records to determine previous subject property ownership was not performed; and
- A certified title search inclusive of environmental liens and property use limitations searches was not provided by the User.

Signature and Qualifications of Environmental Professional Conducting Site Assessment

Mr. Jeffrey Hughes of WSP prepared this PESA report.

By signing this report, I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 CFR Part 312, Section 312.10, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in AAI (40 CFR Part 312). My resume is provided as Appendix H.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TARGET STORE 0866	2333 63RD ST	E 1/8 - 1/4 (0.164 mi.)	12	21

EXECUTIVE SUMMARY

EPA ID:: ILR000114322

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WALGREENS 2720 EPA ID:: ILR000114504	6240 BELMONT	E 1/8 - 1/4 (0.207 mi.)	13	29

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the LUST list, as provided by EDR, and dated 07/20/2020 has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
M-CUBED PETRO FIVE, NFA/NFR Letter: 2000-03-27 Incident Num: 920124 Incident Num: 20071238 IL EPA Id: 431255022	3004 HOBSON ROAD	SW 0 - 1/8 (0.063 mi.)	B9	15
EXXON MOBIL OIL NFA/NFR Letter: 2010-08-17 Incident Num: 20091257 IL EPA Id: 430305144	2181 63RD STREET	E 1/4 - 1/2 (0.278 mi.)	15	50

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the UST list, as provided by EDR, and dated 07/20/2020 has revealed that there are 2 UST

EXECUTIVE SUMMARY

sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
THORNTON'S #121 Tank Status: Currently in use Status: ACTIVE Facility Id: 2034514	2401 63RD STREET	E 0 - 1/8 (0.018 mi.)	A4	9
AUSTIN OIL, INC. Tank Status: Removed Tank Status: Currently in use Status: ACTIVE Facility Id: 2010038	3004 HOBSON RD.	SW 0 - 1/8 (0.063 mi.)	B8	13

AST: Listing of all aboveground tanks inspected by Office of State Fire Marshal.

A review of the AST list, as provided by EDR, and dated 07/01/2020 has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CLARK OIL STATION NO EPA ID:: IL0000030338	3004 HOBSON RD	SW 0 - 1/8 (0.063 mi.)	B10	18

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GOODRICH SCHOOL-DIST Registry ID:: 110007270103	HOBSON RD AND ROUTE	0 - 1/8 (0.000 mi.)	3	8

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 06/27/2020 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GOODRICH SCHOOL-DIST Registry ID: 110007270103	HOBSON RD AND ROUTE	0 - 1/8 (0.000 mi.)	3	8

EXECUTIVE SUMMARY

AIRS: A listing of air permits and emissions information.

A review of the AIRS list, as provided by EDR, and dated 06/25/2020 has revealed that there is 1 AIRS site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GOODRICH SCHOOL-DIST Facility Id: 4775	HOBSON RD AND ROUTE	0 - 1/8 (0.000 mi.)	3	8

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OIL EXPERTS	2449 63RD ST	0 - 1/8 (0.000 mi.)	A1	8
THORNTONS INC	2401 63RD ST	E 0 - 1/8 (0.018 mi.)	A5	12
ALMEREAZ STACY	3004 HOBSON RD	SW 0 - 1/8 (0.063 mi.)	B7	13

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

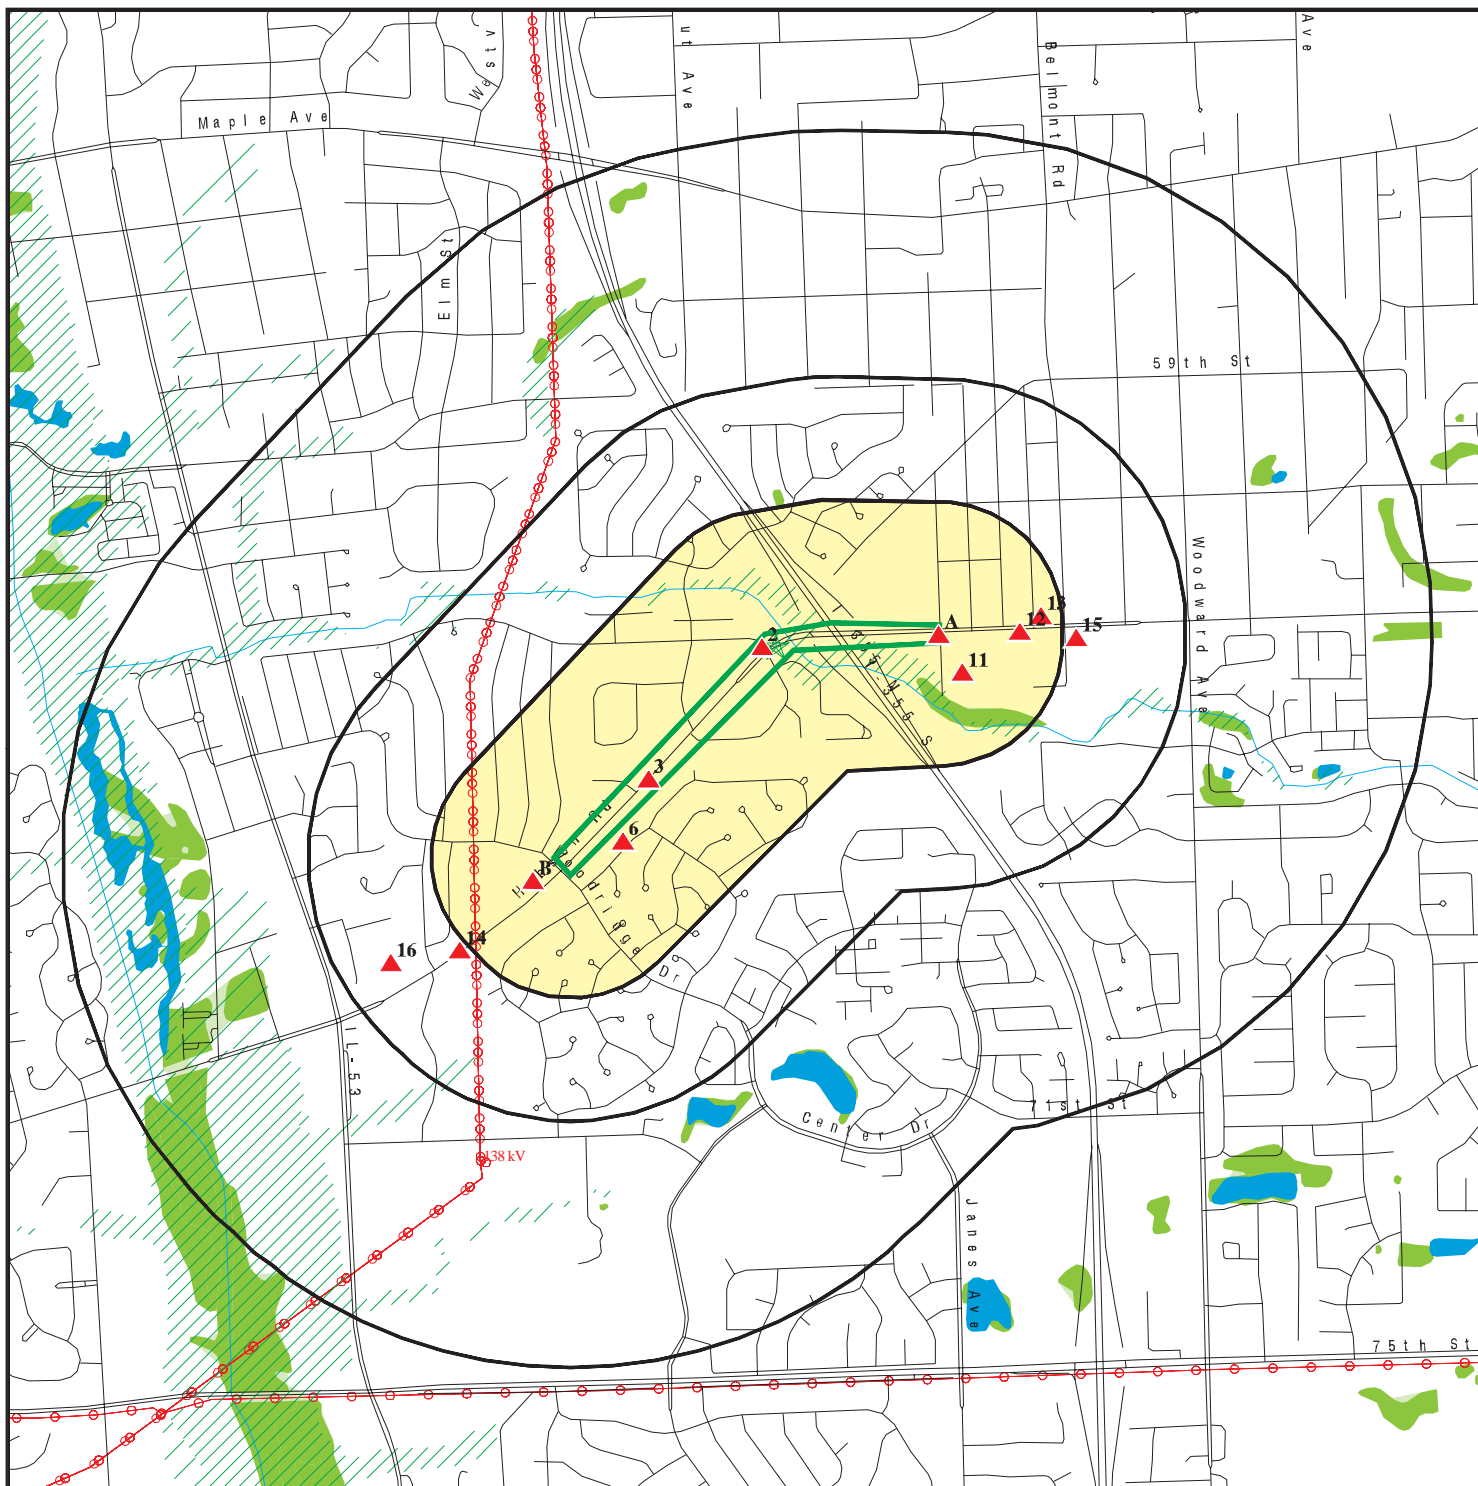

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System:
 AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
 ACES (Illinois - Agency Compliance And Enforcement System) is the

Environmental Interest/Information System:

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/01/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/02/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019
Date Data Arrived at EDR: 04/05/2019
Date Made Active in Reports: 05/14/2019
Number of Days to Update: 39

Telephone: 703-603-8704
Last EDR Contact: 10/02/2020
Next Scheduled EDR Contact: 01/11/2021
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/29/2020

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990	Source: Illinois EPA

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 10/20/2020	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

USGS TOPOGRAPHIC MAP

Target Property Map: 5680801 WHEATON, IL
Version Date: 2012

South Map: 5680777 ROMEOVILLE, IL
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Markham

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
2	7 inches	31 inches		Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
3	31 inches	59 inches		Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: Sawmill

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
2	29 inches	48 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
3	48 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Markham

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	20 inches	31 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.9
2	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.9

1	33 inches	38 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
2	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
3	11 inches	33 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
4	38 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 10

Soil Component Name: Beecher

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 33 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
2	9 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
3	20 inches	37 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
4	37 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Illinois State Geological Survey

Telephone: 217-333-4747

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ecology and Environment, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Analytical Data

Analytical Data Summary WO06 Hobson Road

Key to Data Tables

- MAC = Maximum Allowable Concentration of Chemical Constituent in Uncontaminated Soil Used as Fill Material At Regulated Fill Operations
- mg/kg = Milligrams per kilogram.
- mg/L = Milligrams per liter.
- MSA = Metropolitan Statistical Area
- TACO = Tiered Approach to Corrective Action Objectives
- TCLP = Toxicity Characteristic Leaching Procedure.
- SCGIER = Soil Component of the Groundwater Ingestion Exposure Route
- SPLP = Synthetic Precipitation Leaching Procedure.
- ND = Not detected.
- NA = Not analyzed.
- J = Estimated value.
- U = Analyte was analyzed for but not detected.

Criteria Qualifiers and Shading

- # = pH is less than 6.25 or greater than 9.0 standard units.
- † = Concentration exceeds the most stringent MAC.
- m = Concentration exceeds the MAC for an MSA.
- * = Concentration exceeds the MAC for Chicago corporate limits.
- c = Concentration exceeds a TACO Tier 1 RO for the Construction Worker Exposure Route.
- L = The detected TCLP/SPLP concentration exceeds the TACO Tier 1 RO for the SCGIER.
- W1 = Concentration exceeds the Tier 1 RO for the Groundwater Component of the Groundwater Ingestion Route for Class 1 groundwater.
- W1,2 = Concentration exceeds the Tier 1 RO for the Groundwater Component of the Groundwater Ingestion Route for Class 1 and Class 2 groundwater.
-  = Concentration exceeds the most stringent MAC, but is below the MAC for an MSA.
-  = Concentration exceeds the most stringent MAC and the MAC for Chicago corporate limits.
-  = Concentration exceeds applicable comparison criteria.

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Case Narrative

Client: Ecology and Environment, Inc.
Project/Site: Hobson Rd Sidewalk Improvements

Job ID: 500-191102-1

Job ID: 500-191102-1

Laboratory: Eurofins TestAmerica, Chicago

Narrative

Job Narrative 500-191102-1

Receipt

The samples were received on 11/13/2020 3:05 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 1.5° C.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA

Method 8082A: Surrogate Tetrachloro-m-xylene recovery for the following Continuing Calibration Verification (CCV)/7 was outside control limits: (CCV 500-572902/7). The other surrogate was within limits; therefore, re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

Method 9045D: Reanalysis of the following sample was performed outside of the analytical holding time due to the instrument QC in the original batch being outside of control limits : ENVMT-06-B01 (500-191102-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Definitions/Glossary

Client: Ecology and Environment, Inc.
Project/Site: Hobson Rd Sidewalk Improvements

Job ID: 500-191102-1

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	1.5
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Resume

Jeff has 30 years' experience in environmental evaluation.

EDUCATION

B.S., Industrial Technology,
Purdue University

Jeffrey L. Hughes

Environmental Scientist

Mr. Hughes qualifies as an environmental professional as set forth in 40 CFR §312.10(b). He has performed numerous nationwide Phase I and Phase II ESAs in accordance with ASTM Standards E1527 and E2247 for clients to show due diligence for facility or land purchase and siting of wind and solar farms.

Statewide Hazardous Waste Investigations, Illinois. Since 2002, Mr. Hughes has been a site project manager under E & E's multisite contract with IDOT. He has led and conducted soil and groundwater sampling and preliminary site investigations for potential hazardous waste sites and sites suspected to contain chemical spills and/or unsecured materials of concern. His responsibilities as project manager include work plan development, health and safety plan preparation, field team leadership, and final report writing. The projects include right-of-way characterizations of property already owned by IDOT, as well as evaluations to support planned IDOT construction activities.

Environmental and Safety Compliance Assessments, Illinois. For a confidential state agency, Mr. Hughes has conducted environmental and safety compliance assessments at state-owned buildings, maintenance yards, laboratories, and rest areas. He has reviewed the facility operations, in order to help ensure compliance with all federal, state, and local environmental and safety regulations; and all air, water, and hazardous waste permit conditions. He also made recommendations on best management practices involving operations that affect the environment and worker safety.

Walnut Ridge Wind Farm, Illinois. Mr. Hughes set up a noise monitoring network for a baseline study of the project area in support of Geronimo Energy, LLC, for the proposed 210-MW wind farm, which is currently under development.

ECAMP Assessments, Nationwide. For AFRC, Mr. Hughes conducted Environmental Compliance and Management Program (ECAMP) assessments at bases nationwide. He worked with AFRC environmental specialists to review basewide operations to help ensure compliance with all federal, state, and local environmental regulations; all executive orders dealing with the environment; and all air, water, and hazardous waste permit conditions.

Industrial Site, South Hill, Virginia. For a confidential client, Mr. Hughes conducted a Phase II site assessment following guidelines of ASTM 1527. He coordinated with site representatives, drilling subcontractors, and the analytical laboratory; sampled soil and water; and prepared the final report.

Private-Sector Air Quality Programs, Gary, Indiana. Mr. Hughes managed the start-up of a regional environmental consulting operation for indoor air quality studies, completion of Indiana air permit applications, and performance of Phase I environmental regulatory compliance audits.
